

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Job	Type: Full-time	Category: Engineering

Description

Key Duties and Responsibilities

- Accountable for all aspects of the safe and efficient execution, quality control and documentation of mechanical work at our Syncrude Location
- Specific to turnarounds, the incumbent would be accountable for planning, management of craft, organization of work packages and clarification of work scope with the customer
- Responsible for financial, billing, project controls and correct payroll submissions
- Provide leadership to field supervisors on day to day field mechanical work
- Ensuring adherence to client specifications for field reporting
- Monitoring progress against project schedules and budgets
- Coordinates manpower and project requirements by evaluating and maximizing existing resources
- Develops and maintains positive customer relations by leading through safe work performance and measurable key performance indicators
- Collaborates with management on all operational and personal issues
- Assists in the development and administration of sales, operating and capital budgets and various cost saving strategies

Role Specifications

- 15 years of industry experience
- 10 years of leadership experience in a supervisor or managerial role
- P. Eng designation with a mechanical engineer background or journeyman trade certification is an asset
- Project Management Professional (PMP) designation an asset
- Previous experience in the Oil and Gas sector considered an asset preference given to candidates with Fort McMurray oil sands experience

Personal Characteristics

- You're a technical expert, you can read drawings, interpret job scope and know best how to manage quality control
- Planning, scheduling, cost control are all in your wheel house
- You've got the industry experience to lead field leadership in their daily execution

The above statements are intended to describe the general nature and level of work being performed. They are not intended to be an exhausted list of all responsibilities, duties and skills required.
