Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Job number: R-1004012

Location: Regina, Saskatchewan

Closing date: August 8, 2022

Language(s) required: English

Worker Type: Permanent

Solid communication skills plus technical expertise needed

Join the team responsible for technology and information risk management. You'll bring technical expertise to help develop foundational risk management practices. Using your in-depth knowledge of risk management practices and strong communication skills, you'll identify, assess and monitor technology and information risk, assist in policy development, and explain technical concepts to a non-technical audience.

What you'll do:

- Develop requirements for reporting on risk categories and subcategories in accordance with risk taxonomies.

- Research and implement key risk indicators to monitor FCC's overall risk trends

- Aggregate insights through risk reporting information and oversee the development of regular executive reports for the Board of Directors and risk management committees

What we're looking for:

- Dedicated team player who shines in an agile, multi-department and collaborative environment

- Problem-solver able to deliver on critical timelines and manage multiple priorities

- Relationship-builder and influencer with proven intellectual curiosity

What you'll need:

- Undergraduate degree in agriculture, economics or business administration; a finance, accounting or risk management designation; at least four years of experience (or an equivalent combination of education and experience)
