Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

About Toronto Metropolitan
At the intersection of mind and action, Toronto Metropolitan University is on a transformative path to become Canada’s leading comprehensive innovation university. Integral to this path is the placement of equity, diversity and inclusion as fundamental to our institutional culture. Our current academic plan outlines each as core values and we work to embed them in all that we do.We welcome those who have demonstrated a commitment to upholding the values of equity, diversity, and inclusion and will assist us to expand our capacity for diversity in the broadest sense. In addition, to correct the conditions of disadvantage in employment in Canada, we encourage applications from members of groups that have been historically disadvantaged and marginalized, including First Nations, Metis and Inuit peoples, Indigenous peoples of North America, racialized persons, persons with disabilities, and those who identify as women and/or 2SLGBTQ+. Please note that all qualified candidates are encouraged to apply; however, applications from Canadians and permanent residents will be given priority.In April 2022, the university announced our new name of Toronto Metropolitan University, which will be implemented in a phased approach. Learn more about our next chapter..The Team
The DMZ is a world-leading startup incubator equipping the next generation of tech entrepreneurs with the tools needed to build, launch, and scale highly impactful startups. By providing connections to customers, coaching, capital, and a community, the DMZ’s customized approach helps innovators reach the next milestone in their entrepreneurial journey – whatever that might be. Through its award-winning programming, the DMZ has helped more than 720 startups raise $1.75 billion in capital and create 4,600+ jobs. Headquartered in Toronto, Canada with globally-accessible programming, the DMZ has a widely-recognized international presence with offices in Vietnam and India, and partnerships across North America, Latin America, Africa and Asia.

The Opportunity
The Full Stack Developer leads the design and development of business critical databases, web and mobile applications that provide information and statistics reporting relevant to the monitoring of DMZ’s key performance indicators. The successful candidate will test accessibility and

functionality to ensure compatibility, best practices for user-centric digital solutions and provide the day-to-day information system support for the DMZ under the general guidance of the Director, Operations & Special Projects. The successful candidate will troubleshoot and set up a variety of computer, mechanical and electronic based technologies and provide technical advice and support to DMZ staff and team members. Qualifications Successful completion of a post-secondary degree in Computer Science or a related field and a minimum of three (3) years of relevant work experience in both technical computer applications and infrastructure projects in the following are required: Full stack development, working with various modern libraries and frameworks, Strong familiarity with database technologies Strong knowledge of programming languages: PHP, JavaScript, JSON, SQL, and SAML) Strong understanding and application of information system architecture, integrating third party Application Programming Interface (API), and debugging large program files

 Demonstrated IT project management experience from design, development, administration and maintenance of databases, web and mobile applications and infrastructure systems support.
 Knowledge of front end code and database layer;   Knowledge of code versioning tools to maintain code integrity and organization; Understanding and implementation of security and data protection; Creating servers and databases for functionality Solid oral and written communication skills for report writing, making recommendations and general correspondence, facilitating meetings, workshops, etc. Strong interpersonal relationship skills to facilitate client and team meetings, representing the DMZ with regards to facility and systems management and enhancement with internal and external stakeholders on specific project milestones. Strong commitment to client service, especially staff, student, faculty and external stakeholders.
