

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Link's Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

About Toronto Metropolitan

At the intersection of mind and action, Toronto Metropolitan University is on a transformative path to become Canada's leading comprehensive innovation university. Integral to this path is the placement of equity, diversity and inclusion as fundamental to our institutional culture. Our current academic plan outlines each as core values and we work to embed them in all that we do. We welcome those who have demonstrated a commitment to upholding the values of equity, diversity, and inclusion and will assist us to expand our capacity for diversity in the broadest sense. In addition, to correct the conditions of disadvantage in employment in Canada, we encourage applications from members of groups that have been historically disadvantaged and marginalized, including First Nations, Metis and Inuit peoples, Indigenous peoples of North America, racialized persons, persons with disabilities, and those who identify as women and/or 2SLGBTQ+. Please note that all qualified candidates are encouraged to apply; however, applications from Canadians and permanent residents will be given priority. In April 2022, the university announced our new name of Toronto Metropolitan University, which will be implemented in a phased approach. Learn more about our next chapter. The team

Computing and Communications Services (CCS) is Toronto Metropolitan University's central IT organization, supporting the university's voice and data communications, server and storage infrastructure, printing, end-user computing support, computer labs, learning management system, application support, web application development, streaming media services, presentation technology-enabled classrooms and much more.

We are extremely proud of our university and what we are accomplishing as a department. We welcome you to get to know our people and services better before you decide to apply to join our team. Visit us at <http://www.torontomu.ca/ccs/> and search @torontomet and @bdlesser on Twitter.

The Opportunity

The successful candidate will ensure Toronto Metropolitan University's complex set of network systems and services meet the current and projected needs of the TMU's community in cost effective manner. You will be asked to provide leadership to the University's community in technology planning of robust IP network and Internet services, manage and oversee all network related projects and monitor the performance of network systems across the University. As the Manager of Network Engineering, responsibilities will also include supervising the Senior Network Specialists and Intermediate Network Specialists.

Qualifications

To help us learn more about you, please provide a cover letter and resume describing how you meet the following required qualifications:

- Specific training or job experience required before appointment includes:
- Completion of a post-secondary degree in Management Information Systems, Computer Science, Electrical/Electronic Engineering, Telecom Engineering or a related field.
- A minimum of five (5) to seven (7) years of experience managing a large, complex network Infrastructure operation (IP based networks, Wi-Fi and data center network), including two (2) years of experience in a senior level role of Project Management and experience supervising staff.
- Experience in Extreme and Aruba networking products
- Strong leadership and management skills;
- Project management skills;
- Problem solving;
- Communications and presentation skills;
- Ability to work in a collaborative manner and deal effectively with people;
- Ability to assess and understand the dynamics of a group or team;
- Knowledge of the principles of computer networks and securing them;
- Knowledge of budget preparation.
- Extensive knowledge of managing the availability, reliability, and security of large complex network to specified service levels;
- Knowledge of designing and/or implementing wide area network (WAN), local area networks (LAN) technologies and IT Security technologies
