

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Role:

Intermodal Heavy Duty Mechanics perform major and minor repairs, overhauls and servicing on all types of vehicles, vehicle attachments and material handling equipment.

Critical performance areas include the following:

- Inspect, service and maintain Intermodal cranes, terminal tractors, vehicles and equipment, in accordance with federal and company regulations, including changing oil or repairing, replacing, cleaning and adjusting parts.
- Diagnose diesel / gas engine, electrical, hydraulic, driveline malfunctions and making required repairs.
- Use electric and oxy-acetylene welding equipment, lubrication equipment and other vehicle repair tools and equipment, and operate said tools and machinery in a safe and effective manner.
- Use measuring devices and understanding visual displays.
- Repair various yard equipment machinery.
- Prepare inspection, maintenance, and work reports, and record details on prescribed forms in accordance with established procedures.

Working Conditions:

- Ability to work irregular shifts, including evenings, midnights, weekends, holidays, and occasional overtime.
- Frequent bending, stooping, squatting, kneeling, performing overhead work, lifting/carrying up to 50 pounds (22 kg).
- Shop environment, ability to work inside shop and outside shop in all weather conditions.
- Must be able to work at heights up to 60 feet.
- Comply with safe work procedures and policies.

Employment Requirements:

- High School diploma or equivalent General Education Diploma (GED).
- Diploma of Vocational Studies in Heavy Duty Mechanic.
- Diesel mechanic, Automotive, Truck & Coach, Hydraulics experience.
- Valid driver's license.
- Technical knowledge of diesel mechanics.
- Good hand-eye coordination.
- Possess your own tools sufficient to perform repairs and service on small equipment. Tools specific to the railway are supplied by the company.

Assets:

- Experience troubleshooting hydraulic and electronic systems.
- Commercial Transport or preferably Heavy Duty Working experience.
- Welding skills.
- Relevant work experience in similar working conditions or regulatory/safety environment.
- Post-secondary education.
- Basic computer skills.

Training:

Successful candidates will receive paid on-the-job training on new products and updates as required by the company, both theoretical and practical instructions.

Depending on your level of experience, candidates must have completed 2nd year and registered with trade branch for 3rd year and will attend a series of courses at your work location in Canada or away from your work area for training purposes. Training will include intermodal equipment components, control systems, air brakes, start up, basic diesel electric systems and CN maintenance regulations. Truck motors, data recorders, as well as fuel, oil, water and air systems will also be covered. Successful completion of this program is essential for performance of future duties.

The ideal candidate profile:

Ability to work autonomously, adapt to different situations and manage stress.

Demonstrate good teamwork skills and maintain positive interactions with others.

Good verbal, reading comprehension and writing skills.

Dedicated to getting the job done while meeting established standards of quality, safety and client satisfaction.
