

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Job	Type: Full-time	Category: Education
Job Start Date	July 1, 2023	
Languages	English	

Description

The Department of Earth Sciences is seeking a candidate for the Robert W. Hodder Chair in Economic Geology, in honour of the late Professor Robert W. Hodder. The successful candidate will be appointed at the rank of Assistant Professor (Probationary (tenure-track)), Associate Professor (Probationary (tenure-track) or with Tenure), or Full Professor with Tenure depending on qualifications and experience. The salary will be commensurate with the successful candidate's qualifications and experience.

The successful candidate must have a PhD in an Earth Sciences or related field and will bring skills and experiences complementary to the Department. The candidate will have an established track record of ore deposit research and funding, mineral exploration industry partnerships, and collaborations with diverse stakeholders. The candidate's research would ideally specialize in critical minerals as defined by The Canadian Critical Minerals Strategy (<https://www.canada.ca/en/campaign/critical-minerals-in-canada/canadian-critical-minerals-strategy.html>) and/or precious metals, emphasizing field work and relating geoscience observations to mineral systems models. Industry collaborative projects and research should be complemented by excellent communication skills and an enthusiasm for, and innovative approach to, teaching and enhancing student education.

Research in the Department of Earth Sciences at Western falls into the broad themes of Earth and Planetary Systems; Resource Geoscience; Tectonic Processes and Crustal Dynamics; and Earth Evolution: Life, Climate and Environment. The successful candidate will be expected to establish and maintain a vigorous, independently funded research program in Economic Geology, and to collaborate with other faculty members in one or more of our research themes. The successful candidate is expected to supervise graduate students at the MSc and PhD levels and to teach broadly-based as well as specialized courses in Economic Geology and related fields, both at the undergraduate and graduate levels. This is an exceptional opportunity for a geologist with industry experience to enhance a departmental tradition of field-based teaching and research through engagement of alumni and others active in mineral exploration.

About Western: Western University delivers an academic experience second to none. Western challenges the best and brightest faculty, staff and students to commit to the highest global standards. Our research excellence expands knowledge and drives discovery with real-world application. Western attracts individuals with a broad worldview, seeking to study, influence and lead in the international community. Since 1878, The Western Experience has combined academic excellence with life-long opportunities for intellectual, social and cultural growth in order to better serve our communities.

About the Department: Western's Department of Earth Sciences is a collegial and dynamic department combining cutting-edge academic and applied research with strong mentorship and teaching at both the graduate and undergraduate level. Our graduates can be found in industry, academia and governments across Canada and around the world. Our department currently offers programs for professional registration in Geology, Geophysics, and in Environmental Geoscience. The successful candidate will have access to a high calibre array of modern research and collections facilities such as the Earth and Planetary Materials Analysis Laboratory and the Richard W. Hutchinson Geoscience Collaborative Suite, as well as research facilities at Surface Science Western and the Nanofab Laboratory. More information on our department is available at <https://www.uwo.ca/earth/>.

How to Apply

Click Apply Now!

A complete application must include the following:

- 1) a cover letter outlining interest and qualifications for the position

2) a detailed curriculum vitae including publication record, academic and teaching record, awards, scholarships, etc.*

3) a maximum two-page document describing the candidate's proposed research program

4) a maximum two-page statement describing teaching philosophy, interests and teaching experience including but not limited to University level courses, short courses, field schools, mentorships, training of highly qualified personnel, etc.

5) the names, phone numbers, and email addresses of 3 references

6) Candidates must also complete and submit the Faculty Relations application form:

<https://www.uwo.ca/facultyrelations/pdf/full-time-application-form.pdf>

*Western recognizes the potential impact that career interruptions can have on a candidate's record of research achievement, and potential candidates are encouraged to list career disruptions. If feasible, candidates are encouraged to explain within their application the impact these career interruptions have had and to submit a full career or extended CV.

The application should be submitted as a single PDF file to eschair@uwo.ca, Department of Earth Sciences.

Review of applications will start on March 1, 2023 and continue until the position is filled. The preferred starting date is July 1, 2023, but is negotiable.

Positions are subject to budget approval. Applicants should have fluent written and oral communication skills in English. The University invites applications from all qualified individuals.

Western is committed to employment equity and diversity in the workplace and welcomes applications from women, members of racialized groups, Indigenous peoples, persons with disabilities, persons of any sexual orientation, and persons of any gender identity or gender expression.

In accordance with Canadian immigration requirements, priority will be given to Canadian citizens and permanent residents.

Accommodations are available for applicants with disabilities throughout the recruitment process.

If you require accommodations for interviews or other meetings, please contact

Kristen Harris at 519-661-3191 or kharri27@uwo.ca.
