

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Ministry of Environment and Climate Change Strategy

Currently there are 2 permanent vacancies; 1 vacancy in Kamloops and 1 vacancy in Prince George.

Environmental Impact Assessment Biologist

\$63,973.31 - \$72,937.86 annually effective April 14, 2019

The Monitoring, Assessment and Stewardship (MAS) Section is located within the regional offices of the Environmental Protection Division of the Ministry of Environment and Climate Change Strategy. This Section houses the regional expertise in environmental impact monitoring and assessment related to point and non-point sources of water, land and air pollution.

The Environmental Impact Assessment Biologist provides biological, chemical and other environmental impact assessment (EIA) support to legislated and other statutory decision makers by recommending effluent management and monitoring requirements for Environmental Management Act authorizations. This position designs, implements and assesses water quality monitoring programs for EIA studies and provides technical input on Environmental Management Act and Environmental Assessment Act reviews. Other responsibilities include monitoring support for site-specific water quality objectives development, providing impact assessment support for enforcement activities under the Environmental Management Act and Canada Fisheries Act, maintaining knowledge of current research in the field, overseeing junior staff, and administratively managing contracts.

Qualifications for this role include:

• Bachelor's degree in Biology, Environmental Studies or various multi-disciplinary resource management studies, or other related fields, and 3 years of recent, related experience*; or

• Other relevant combinations of education and experience such as a Master's degree in a related field, plus 2 years of recent, related experience* may be considered.

• Applicants who possess the above educational requirements and demonstrate on their resume that they have experience directly related to aquatic environmental impact assessment may be preferred.

• Membership in good standing or immediate eligibility for membership as a Registered Professional Biologist (RPBio) with the College of Applied Biologists of BC.

*Related Experience must have been completed in the last 5 years and must include 2 or more of the following:

• Experience managing complex and sensitive projects (project proposals, budget management, implementation analysis and recommendations)

• Managing and conducting environmental monitoring, assessments and reporting;

• Liaising with environmental regulatory agencies and non-government agencies;

• Experience conducting aquatic or marine environmental impact assessments and making recommendations; and,

• Conducting scientific assessment and using data evaluation techniques including use of statistics in EIA data analysis
