

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Canpotex is hiring an Operations Analyst (22-03) to join the Operations team in our Saskatoon office.

Canpotex is currently undertaking several exciting initiatives focused on people, processes, and technology with an upcoming relocation of our head office within Saskatoon and accompanying a shift to a Hybrid Work Model.

What you will do:

- Reporting to the Senior Vice President, Operations, you collaborate with various internal and external stakeholders to realize operational opportunities with urgency.
- Efficiently gather and analyze data, provide recommendations and assist in implementing operations solutions to support our core organizational functions and business processes.
- Proactively use analytical and quantitative methods to understand, predict, and enhance the full cycle operations process.
- Assemble data, analyze performance, identify problems, and develop recommendations which support international operations.
- Collaborate with the Operations team to help identify opportunities to create cost-effective business process and reduce time to completion.
- Assist in the planning and implementing of supply chain optimization projects.
- Track key performance indicators and report on performance.

What you will bring:

- Bachelor's degree or Diploma in Engineering, Computer Science, Logistics, Business Analytics, Mathematics, or a related field.
- Minimum three to five years of relevant work experience in logistics, supply chain processes and/or business analysis.
- A strong knowledge to understand technical operational requirement and integrate big picture strategies.
- An equivalent combination of education and experience may be considered.

Who you are:

- Demonstrated ability to quickly and efficiently synthesize information.

- Exceptional analytical, mathematical, and creative problem-solving skills.
- Ability to build and maintain positive business relationships.
- Ability to foster a culture of innovation by identifying problematic areas, defining root problems, and providing solutions to optimize operations.
- Excellent listening, interpersonal, written, and oral communication skills at both a technical and user-friendly level.
- Meticulous attention to detail, organizational ability, and effective time-management skills.

Who we are:

Canpotex is one of the world's largest suppliers of potash overseas. On behalf of our Shareholders, Mosaic and Nutrien, we market and deliver Saskatchewan potash, a valuable fertilizer nutrient, to millions of fields and farmers, helping the world grow more food.
