Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Cyber security leadership skills needed

Lead the high-performing team responsible to prevent, detect and respond to cyber threats.

What you'll do:

- Ensure teams are aligned on technical and process direction

- Facilitate cross-divisional collaborative efforts to deliver outstanding solutions

- Use your knowledge of corporate partnerships and leadership to deepen key relationships

- Coach employees through agile delivery processes and methodology such as Scrum or Kanban

- Remove impediments affecting velocity or quality of deliverables to help the team be productive and focused

- Develop resourcing and recruitment strategies

- Design and propose annual budget

- Considers policies, regulations and impact on systems when making decisions

- Mentor the team in development planning, workload management, and setting and achieving performance objectives

What we're looking for:

- Proven leader able to engage and empower employees with clear line of sight to business goals

- Experienced coach able to lead other leaders

- Relationship-builder and collaborator committed to helping others reach their goals

- Strategic thinker and experienced business professional with sound judgment

What you'll need:

- A bachelor's degree in computer science, mathematics, engineering or business and at least eight years of experience (or equivalent combination of education and experience)

- At least five years in a formal leadership position

- Significant record of success using agile methodologies for technology lifecycle management

- Knowledge of agriculture and lending is an asset
