

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Company	Suncor	
Location	Calgary, Alberta	
Date Posted	From: 2018-09-17	To: 2050-01-01
Job	Type: Full-time	Category: Resource Sector

Description

LOCATION: Calgary, Alberta (CA-AB)

JOB NUMBER: 25211

Job Overview Co-op positions at Suncor are more than just a work term. They provide you with meaningful and challenging work experiences to help enable you to determine where you want your career to go – better yet, many of our co-op students go on to become permanent Suncor employees after they graduate! You will work side-by-side with some of the most talented people in the energy industry, and your work assignments and mentoring will offer you extraordinary academic and career growth. We will help you to develop your professional skills and establish relationships with internal partners. In this position, you will report to the closure technology manager and you will help maintain the dozens of ongoing research projects and collaborate with the university researchers and consultants working on our mine and in situ project site.

Key Accountabilities

- Research projects include wetland, forest and lake design and monitoring; treatment wetland engineering; caribou conservation; wildlife risk assessment; and improving carbon sequestration in reclamation planning; water treatment; and reconciliation-focused efforts in landscape repair and conservation
- Provide support to projects; organizing meetings and workshops with partners and Aboriginals
- Participate and attend team meetings, write and/or review research reports and attend workshops as required
- Develop a deep understanding of data analysis and provide support in developing presentations

Required Qualifications Experience and Education:

- Prior field work and samples collection (water, soils, biological)
- Currently enrolled in a formal co-op program in 3rd or 4th year Environmental Science program at an accredited post-secondary institution, and returning to full-time studies after the work term
- Attach your transcripts with your application in order to be considered; clearly indicate the length of work term for which you are available

Skills and Knowledge:

- Flexibility in handling multiple tasks and priorities with a strong attention to detail
- Proficiency in the Microsoft Office suite of products including Word, Excel, PowerPoint and Outlook
- Familiarity with SAP would be an asset
- We value a self-starter with the ability to effectively work with minimal supervision to independently prioritize and handle workload; in particular, exercising independent discernment in planning, organizing, implementing and completing projects and initiatives
- Adherence to procedures: you don't take or tolerate shortcuts and if the procedure is incorrect, you help to fix it
- Continually seek knowledge and understanding: you strive to understand the systems, processes and hazards in and around the workplace

Working Conditions

- This position will be based in Calgary for an 8 or 12-month work term, from January 2019 – December 2019
- Relocation support will be provided if approved for the position; we offer highly competitive housing assistance to eligible candidates
