

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Company The Nielsen Company

Location Markham, Ontario

Date Posted From: 2019-10-03 To: 2020-03-31

Job Type: Full-time Category: Information Technology

Languages English

Description

Nielsen studies consumers in over 100 countries to provide our clients the most complete view of trends and habits worldwide. Our dynamic team designs, builds and maintains software solutions that enable us to drive insights for our clients.

Nielsen is an Academy Company with a strong technical and soft skills training program. We give our employees the skills to work with next generation Big Data and Business Intelligence tools such as Hadoop and MicroStrategy, creating proof of concepts and developing software for mobile and traditional platforms. We are proud of our flexible and casual work environment.

Job Purpose:

We are currently looking to hire several seasoned C++ engineers to our growing team. The ideal candidate would be someone who can hit the ground running with C++ and comes from a Mathematics/Quantitative background. If you are a C++ developer and are looking for an opportunity to work with multi-terabyte to multi-petabyte range of data then this might be the opportunity for you!

Responsibilities:

• Design, analyze, develop, document, test, and maintain highly complex software systems with high-quality standards, minimal defects, and the most effective technical solutions for the business.

• Interact with Product Owners, and Delivery Leads to construct complex software applications from verbal and written requirements.

• Contribute to the planning for acceptance testing and implementation of new software, performing configuration management tasks.

• Provide support to internal users, support staff, and vendor partners to assess production incidents, estimate application changes, and apply timely resolutions.

Experience

The ideal candidate will have:

• Degree in Computer Science, Math, Engineering or a related discipline

• 2+ years of software development/engineering experience

• 4+ years of IT experience

• 1+ years of experience working with onshore and offshore team members

â€¢Mastery of C++ working in a Unix/Linux environment.

â€¢Practical knowledge of Data Structures and Algorithmic development.

â€¢Prior experience with performance tuning.

â€¢Experience in one or more of MS SQL, Oracle, Sybase or other RDBMS

â€¢Advanced knowledge of software design and testing principles
