

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Job	Type: Full-time	Category: Resource Sector

Description

LOCATION: Fort McMurray, Alberta (CA-AB)

JOB NUMBER: 26833

Why you should join us: Are you looking for a great opportunity to succeed in an ever-changing and dynamic reliability engineering role? In this role, you will report into the mine mobile equipment reliability team, and will provide mechanical engineering and technical support that will help optimize preventative maintenance strategies and drive continuous improvement of the fleet. You will use your expertise to:

- Ensure that Alberta Occupational Health and Safety requirements are met for asset engineering changes and performance and regulatory compliance
- Develop equipment strategies and preventive maintenance programs
- Conduct ongoing bad actor assessment and develop improvement action plans through close collaboration with engineering, maintenance execution and mine operations teams
- Conduct failure, root cause, and incident investigations and develop recommendations and action plans to prevent reoccurrence
- Develop and maintain condition monitoring strategies and programs such as undercarriage wear measurements, remote monitoring and oil analysis
- Participate in implementing reliability improvement initiatives in conjunction with the equipment asset multi-functional teams
- Lead technical meetings and small scale projects from conception through to implementation
- Develop maintenance scopes of work and design small scope engineering solutions for modifications and/or repairs
- Conduct reliability analysis to predict remaining service life and make recommendations for equipment change out or overhaul

- Liaise with the mine equipment vendors and original equipment manufacturers to resolve technical issues

We'd like to review your application if you have... Must-haves (minimum requirements):

- Four years of experience in mobile mining or heavy equipment maintenance and reliability engineering
- Experience in fleet performance assessment; experience in risk identification, quantification and ranking, business needs analysis and forecasting, and statistical and fleet analysis
- A bachelor's degree in mechanical engineering
- Registered or immediately eligible for registration with the association of professional engineers and geoscientists of Alberta (APEGA) as a professional engineer
- A valid driver's licence and a clean driving record

- Alignment with our values of: safety above all else, respect, raise the bar, commitments matter and do the right thing

Preference for:

- Computer proficiency in Microsoft Office suite; working knowledge of computerized maintenance management systems (preferably SAP) and material management systems
- Proven knowledge in statistical tools such as Minitab and Matlab
- Working knowledge on root cause analysis such as TapRoot, CauseLink, 8D, etc.
- The proven ability to effectively communicate and interact with others across a multitude of business units to develop and build strong positive working relationships

- Strong analytical skills that enable you to make decisions with integrity in order to achieve the best results and deliver the most value
- A highly motivated self-starter with an adaptive work style and ability to handle multiple priorities, challenging demands and function in a positive but dynamic work environment

Where you'll be working, your work schedule, and other meaningful information:

- You will work out of our Base Plant Operations in Fort McMurray, Alberta
 - Hours of work are a regular 40-hour work week, Monday to Friday
 - Relocation support will be provided; we offer highly competitive housing assistance to eligible candidates
 - If you reside outside of Fort McMurray, relocation of your primary residence to within 60 km of Fort McMurray is mandatory. Relocation support will be provided; we offer highly competitive housing assistance to eligible individuals
- SAP:ENG
