

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Mechanical EngineerReference Code: 53491

Location: Canada (CA) - Calgary, AB Job Category: EngineeringEmployment Type: Employee Full-timeRelocation Eligibility: This position is not eligible for our relocation programApplication Deadline: 07/18/2019 We all need energy. It warms our homes, cooks our food, gives us light, and gets us where we need to go. It also improves our quality of life in countless other ways. At TC Energy, our job is to deliver that energy to millions of people who depend on it across North America. And we take our job very seriously. Guided by our values of safety, integrity, responsibility and collaboration, we develop and operate our facilities safely, reliably and with care for our impact on the environment. With our presence across the continent, our people play an active role in building strong communities. We're proud of how our hard work and commitment sets us apart and benefits society, every day. We're looking for new team members who share our values and are ready to take on exciting challenges. The opportunityTC Energy's Canadian Gas Projects & Engineering department is seeking a mechanical engineer to join the team, reporting to the Manager of Canada Gas Projects Measurement Engineering. The Canada Gas Projects Measurement Engineering team is responsible for the engineering oversight of gas measurement projects within the Canada Gas capital program, making our team members an integral part of successful project execution. In this role, your responsibilities during measurement project execution will encompass technical understanding and review of third-party engineering work, along with issue management and resolution throughout the lifecycle of a project. Your role will be technical in nature but demands excellent communication and problem-solving skills to effectively manage the alignment between our third-parties and stakeholders across the Company. What you'll do

- Support development projects through technical scoping and providing competitive solutions to customers
- Make independent design decisions that are aligned to TC Energy's requirements and stakeholders' needs (Projects, Field Operations, Gas Quality, etc.)
- Design oversight of the Company's third-party engineering service providers, ensuring compliance to company specification and standards
- Provide interpretation of specifications and standards to support detailed design and construction
- Support project procurement process
- Provide technical support for construction
- Provide accurate and timely engineering input to regulatory applications and prepare and submit Leave to Open (LTO) packages
- Active engagement in the continuous improvement process (e.g. CDL, Lessons Learned, OFIs, etc.)
- Follow the Company's Practice of Engineering
- Occasional travel may be required based upon business needs

Minimum Qualifications

- Bachelor's degree in Mechanical Engineering from an accredited university
- Professional Engineer (P.Eng) registered, or eligible to register, with the Association of Professional Engineers and Geoscientists of Alberta (APEGA)
- 4 years of applicable experience is required, 5 is preferred

Preferred Qualifications

- Experience with the design and/or construction of gas meter station facilities
- Knowledge of applicable codes (e.g. CSA Z662, ASME B31.3), standards and specifications
- Excellent oral and written communication skills to effectively manage any issues throughout projects
- Proficient in reading and understanding mechanical discipline drawings including piping and instrumentation diagram (P&IDs), piping isometrics and general arrangements
- Strong understanding of the engineering design process, including cross-discipline knowledge
- Organized and ability to balance multiple projects and priorities
- Strong analytical and problem-solving skills with ability to influence and facilitate alignment without authority
- Sound judgement and decision-making abilities
