

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

LOCATION: Fort McMurray, Alberta (CA-AB)

JOB NUMBER: 27571

Why you should join us: If you have an interest in mineral processing and are looking to advance your engineering career, this position might be the right next step for you. You will support continuous improvement in the dynamic world of tailings reduction and accelerated dewatering engineering through process analysis, troubleshooting and work on capital projects. You will use your expertise to:

- Provide support to operations and other specialists in the daily monitoring of process conditions and troubleshooting
- Support plant performance optimization studies
- Manage continuous improvement initiatives, process development initiatives and the management of change
- Support incident investigations and capture
- Act as a mentor to new Engineers in Training and students

We'd like to review your application if you have: Must-haves (minimum requirements):

- An engineering degree
- Four years of related work experience with a working knowledge of mineral beneficiation processes, pumping systems, slurry hydraulics, gravity separation, flotation, and metallurgical accounting
- Familiarity with piping and instrumentation diagrams (P&IDs) and other process-related documentation
- Registration with APEGA or the ability to register as a Professional Engineer or Engineer in Training
- A valid driver's licence and a clean driving record
- Alignment with our values of: safety above all else, respect, raise the bar, commitments matter and do the right thing
- Sharp problem solving and analytical skills along with strong computer skills
- The ability to lead cross-functional teams to deliver on improvement projects
- Effective communication skills with the ability to develop positive working relationships across numerous business units
- Strong collaboration skills that enables you to build strong, positive relationships with diverse groups
- The ability to anticipate potential problems and check for out-of-the-ordinary conditions, as well as having a strong sense of accountability

Preference for:

- A degree in mineral processing, chemical, mechanical or mining engineering
- Oil sands or mineral processing experience
- Experience in leading and coaching team members

Where you'll be working, your work schedule, and other meaningful information:

- You will work out of our Base Plant facility in Fort McMurray, Alberta
- Hours of work are a regular 40-hour work week, Monday to Friday
- If you reside outside of Fort McMurray, relocation of your primary residence to within 60 km of Fort McMurray is mandatory. Relocation support will be provided; we offer highly competitive housing assistance to eligible individuals

Why Suncor We are Canada's leading integrated energy company with a business portfolio that includes oil sands development and upgrading, offshore oil and gas production, petroleum refining, and product marketing under the Petro-Canada brand. Our global presence offers rewarding opportunities for you to learn, contribute, and grow in a variety of career-building positions. We live by the value of safety above all else; do it safely, or don't do it. Our strong track record of growth and a focus on sustainability mean tremendous potential for the future. Learn about our mission, vision and values. In addition to rewarding job opportunities, we offer an attractive employee package, including:

- Competitive base salary, compensation programs, and an annual incentive program
- Flexible benefits package
- Rewarding pension and savings plans

Stay connected to us:

- Follow us on LinkedIn, Facebook and Twitter for the latest job postings and news
- Join our Talent Community and sign up to receive customized job alerts
- Read our Suncor Connections newsletter to see what we're doing in the communities we live and work in

We are an equal opportunity employer and encourage applications from all qualified individuals. We are committed to providing a diverse and inclusive work environment where every employee feels valued and respected. We will consider accessibility accommodations to applicants upon request. Please note that our job postings are typically open for two weeks, so don't delay, apply now. JOB CATEGORY: Engineering
