

# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Worker Type: Term (Fixed Term)

Language(s) Required: English

Term Duration (in months): 11

SAP S/4HANA for Finance and business process development experience needed:

Lead, mentor and support finance systems and technology platforms. You'll implement new processes and system enhancements as well as identify and recommend improvements.

What you'll do:

- Help move finance system and business process projects from idea to implementation
- Support, collaborate and communicate with internal and external stakeholders to resolve financial system incidents
- Analyze complex business requirements including system capabilities, limitations and integrations, and application of accounting policy
- Recommend how finance data should be used, stored and presented

What we're looking for:

- Strong communicator who translates technical data into information that connects with audiences
- Strategic thinker who uses different perspectives and collaboration to analyze situations
- Team player motivated to continuously improve skills and share knowledge
- Multi-tasker able to manage multiple priorities and requests while staying organized and composed

What you'll need:

- A degree in accounting, business or commerce and at least six years of experience (or an equivalent combination of education and experience); experience in SAP S4 is an asset
- In-depth understanding of how financial systems can streamline business processes
