

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

LOCATION: Fort McMurray, Alberta (CA-AB)

JOB NUMBER: 27672Why you should join us:Are you passionate about working with a team of engineers to ensure plant functions remain safe, sustainable, and cost effective We have a phenomenal development opportunity for an electrical and instrumentation (E&I) engineer with process plant or refinery experience at our Fort McMurray location. You will interact with cross-functional teams, maintenance, and operations groups to build on existing strategies. You will also use your dedication to continuous improvement to provide detailed technical assistance for day-to-day upgrading operations.You will use your expertise to:

- Make continuous improvement recommendations for asset capability, safety, and operability through elimination of bad actors and/or improved equipment or component selection and innovation
- Focus on assigned priorities and develop accurate scope of work for turnaround, outages, routine maintenance, and regular improvements
- Ensure equipment design changes align with the engineering standards, practices and management of change systems while evaluating the impact on reliability
- Work closely with maintenance, planners, and operations on equipment reliability issues and failure trends to improve existing asset strategies
- Assist with solving problems on motors, electrical heat trace (EHT), motor control centers (MCCs), switch-gears, relays, uninterruptible power source (UPS), variable frequency drives (VFD) 480V/4160V, and ensure that high quality targeted preventative maintenance (PM) is maintained
- Conduct reliability analysis to predict remaining equipment service life and make recommendations for obsoleted equipment change strategy
- Work with field technicians to provide directions on oversee equipment trouble shooting

We'd like to review your application if you have...Must-haves (minimum requirements):

- Five years of experience in electrical engineering, VFD and high voltage applications
- Maintenance, reliability, and project experience in process plants or refineries
- A Bachelor's degree in Electrical/Instrumentation Engineering
- Been registered or immediately eligible for registration as a Professional Engineer with the Association of Professional Engineers and Geoscientists of Alberta (APEGA)
- Proficiency in Microsoft Office and SAP
- A valid driver's licence and a clean driving record
- Alignment with our values of: safety above all else, respect, raise the bar, commitments matter and do the right thing
- The ability to anticipate potential problems and check for out-of-the-ordinary conditions, as well as having a strong sense of accountability
- Strong collaboration skills that enables you to build strong, positive relationships with diverse groups

Preference for:

- Strong analytical skills including analyzing SAP data, conducting root cause assessment, and drawing and presenting conclusions and recommendations

Where you'll be working, your work schedule, and other important information:

- You will work out of our Base Plant Mine in Fort McMurray, Alberta

- Hours of work are a regular 40-hour work week, Monday to Friday, with the potential for extended work hours based on business needs

- This position is safety sensitive

- If you reside outside of Fort McMurray, relocation of your primary residence to within 60 km of Fort McMurray is mandatory. Relocation support will be provided; we offer highly competitive housing assistance to eligible individuals
