

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

LOCATION: Calgary, Alberta (CA-AB)

JOB NUMBER: 29321 Why you should join us: The digital landscape is changing, and we are on a journey within Suncor to transform and unleash the full potential of our people by applying digital technologies to lead the way to deliver stakeholder value, improved social well-being, and a healthy environment for today and tomorrow. In this role you will help us create the workplace of the future by developing enterprise wide technology architecture that supports business, data, and application with a focus on DevOps. You will use your expertise to: Ensure health and safety is at the forefront of your work and comply with our guidelines, policies, and procedures Work with stakeholders to define and document architecture requirements in support of business initiatives Develop infrastructure patterns to facilitate development and operations (e.g. for Dev-Ops, micro service - API ecosystem) Maintain subject matter expertise on infrastructure technologies including operating systems, databases, networking, storage, virtualization, and software define capabilities including on-premise, cloud, hybrid, and their support Perform technology watch and promote the use of innovative technologies where applicable Build Proof of Concepts (POC) and Proof of Values (POVs) to deliver increased infrastructure reliability, agility and affordability, and provide leadership in these areas Manage and direct contractors hired to supplement the team

We'd like to review your application if you have... Must-haves (minimum requirements): 10 years of experience in information technology with a background in technology architecture, technical support, solutions design, and project delivery Five years working experience in technology/infrastructure architecture including infrastructure as a service

- A Bachelor's degree in Computer Science or an equivalent discipline Strong knowledge of a broad range of technologies including: Linux; Microsoft Windows; SQL and noSQL databases; networking; storage; security (e.g., AAA); virtualization; web/application desktops; telephony; cloud (IaaS, PaaS, e.g. OpenShift, SaaS); Software Defined Data Centres; and systems monitoring tools Knowledge of industry standards and practices (e.g., ITIL) Proven communication (both verbal and written) and interpersonal skills to advise and influence stakeholders and create collaborative partnerships A self-starter attitude and continuous learning mindset to keep abreast of digital changes and new technologies The ability to manage change with stakeholders Alignment with our values of: safety above all else, respect, raise the bar, commitments matter and do the right thing

Preference for:

- Experience with VMware

Where you'll be working, your work schedule, and other meaningful information:

- You will work out of our Calgary head office, located in the Suncor Energy Centre at 150 – 6th Ave S.W.
- Hours of work are a regular 40-hour work week, Monday to Friday, with the potential for extended work hours based on business needs
- Business travel (~20%) may be required to our office in Mississauga and to conferences/training

Why Suncor We are Canada's leading integrated energy company with a business portfolio that includes oil sands development and upgrading, offshore oil and gas production, petroleum refining, and product marketing under the Petro-Canada brand. Our global presence offers rewarding opportunities for you to learn, contribute, and grow in a variety of career-building positions. We live by the value of safety above all else – do it safely, or don't do it. Our strong track record of growth and a focus on sustainability mean tremendous potential for the future. Learn about

our mission, vision and values. In addition to rewarding job opportunities, we offer an attractive employee package, including:

- Competitive base salary, compensation programs, and an annual incentive program
- Flexible benefits package
- Rewarding pension and savings plans

Stay connected to us:
