

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

LOCATION: Calgary, Alberta (CA-AB)

JOB NUMBER: 29314Why you should join us:Does the idea of working in an integrated company, supporting site-wide electrical projects in order to ensure regulatory compliance and reliability of systems excite you We're looking for a collaborative engineer to join our Energy and Utilities team to support power system reliability, outage management, and operations. As an expert in your discipline, you will establish and maintain effective working relationships with internal and external groups, like Information Technology (IT), business leaders, system administrators, auditors, consultants, and vendors, in order to produce the best results. You will use your expertise to:Work with external organizations, including AESO, AUC, MSA, ATCO, WECC, and NERCTrack new standards and modifications to the Alberta Reliability Standards (ARS) and ISO rulesBuild compliance documentation and provide support for internal and external auditsEnsure IT, Operations, and Maintenance reliability compliance processes are developed, implemented and followedImplement training and testing programs to ensure our employees meet all applicable internal and external compliance requirements, which includes understanding relevant laws, regulations, policies, controls and policy violations Storage audit documents and evidential support in Suncor systems accuratelyMonitor internal controls with respect to compliance of required standardsEnsure all field installation inspections align with applicable codes and standardsReview and approve electrical studies for regulatory compliance and reliable operations We'd like to review your application if you have… Must-haves (minimum requirements):Seven years of related experience in an industrial electrical fieldThree years of experience in regulatory compliance Experience in a utility operations environment, up to 260 kVExperience in the power transmission and distribution industry. A Bachelor's degree in Engineering in a relevant field such as Electrical, Automation, or Information TechnologyBeen registered, or are eligible to register, as a Professional Engineer with the Association of Professional Engineers and Geoscientists of Alberta (APEGGA)

- Knowledge of the Alberta Interconnected Electrical System (AIES) operation as well as the deregulated power market
- Proven understanding of AESO, NERC, MSA, and AUC rules, regulations, and standardsAlignment with our values of: safety above all else, respect, raise the bar, commitments matter and do the right thing

Preference for:

- Proficiency with the ETAP and PSSE engineering software
- Experience working with SAP's PM (Project Management) module Strong collaboration skills that enables you to build strong, positive relationships with diverse groups
- Proven non-authoritative leadership skills, mentoring skills, conflict management skills, time management skills, and problem solving skills

Where you'll be working, your work schedule, and other meaningful information:You will work out of our Calgary head office, located in the Suncor Energy Centre at 150 – 6th Ave S.W. Hours of work are a regular 40-hour work week, Monday to FridayThis position is security sensitive which requires you to clear a criminal history check

Why SuncorWe are Canada's leading integrated energy company with a business portfolio that includes oil sands development and upgrading, offshore oil and gas production, petroleum refining, and product marketing under the Petro-Canada brand. Our global presence offers rewarding opportunities for you to learn, contribute, and grow in a variety of career-building positions. We live by the value of safety above all else – do it safely, or don't do it. Our strong track record of growth and a focus on sustainability mean tremendous potential for the future. Learn about

our mission, vision and values. In addition to rewarding job opportunities, we offer an attractive employee package, including:

- Competitive base salary, compensation programs, and an annual incentive program
- Flexible benefits package
- Rewarding pension and savings plans
