

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

This senior IT position is accountable for application and technical solution architecture, design, standards for development and support, and full security compliance in end-to-end information technology initiatives at Northwestel. The Solutions Architect expresses a keen interest in problem-solving, creative thinking, be self-motivated as well as being an active member of cross-functional teams. The position participates in a range of project and operational initiatives with a primary focus on designing, developing and evolving our customer web experience through digital and mobile platforms.

Employment Equity

Northwestel values diversity in the workplace and is committed to the goals of Employment Equity. We strive to achieve a skilled workforce that is representative of the population we serve, and as a Northern company, we are committed to the employment and career development of our Indigenous peoples. Candidates must clearly indicate on their application if they are an Indigenous person, a woman, a person with a disability, or a visible minority if they wish to receive hiring preference.

Specific Accountabilities

Leadership, advocacy and delivery within a cross-functional team framework

Feasibility analyses of potential future projects or operational changes

Design solutions mindful of industry trends, overall business and IT strategies and plans, encompassing mandated compliance with all corporate security policies and practices

Address systems integration, compatibility and multiple platform requirements and constraints;

Understand the current and evolving BSS/OSS environment and how it can be levered within the overall scope of duties

Contribute to business cases for new products and actively participate in identified customer-facing projects

Direct liaison with internal stakeholders, peers, third party vendors and internal IT development teams - to understand customer and company requirements and define the technical requirements to be fulfilled

Provide direction to internal and external developers, content managers and support personnel on design, coding and remediation standards

Knowledge and Competencies Required

Bachelor's Degree in business, computer science, management science, engineering, mathematics or related discipline that demonstrates working knowledge in the Information Systems/Technology field

8 to 10 years of progressive experience in the information technology field, in one or more of the following solutions architecture areas: web, data, security, applications, technology, service-oriented

Demonstrated knowledge of agile development and/or API microservices integration approach to solution delivery

Experience in one or more of the following is desirable: business analysis; project management; web content management applications such as Drupal; business case preparation/feasibility studies

Experience in the telecommunications industry is desirable

Knowledge of telecommunications operational processes and the OSS/BSS systems that support them is desirable

As part of the recruitment process for this position, candidates may be required to take pre-employment tests and/or complete work simulation exercise to assess job fit.

As a safety-conscious CORA, Certified organization, we have an established and comprehensive safety program. We
