

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Manager, Project Construction Management Facilities OR Pipeline Reference Code: 58502

Location: Canada (CA) - Calgary, AB Job Category: Construction Management; Engineering Employment Type: Employee Full-time Relocation Eligibility: This position is eligible for our domestic relocation program Application Deadline: 05/27/2019 We all need energy. It warms our homes, cooks our food, gives us light, and gets us where we need to go. It also improves our quality of life in countless other ways. At TransCanada, our job is to deliver that energy to millions of people who depend on it across North America. And we take our job very seriously. Guided by our values of safety, integrity, responsibility and collaboration, we develop and operate our facilities safely, reliably and with care for our impact on the environment. With our presence across the continent, our people play an active role in building strong communities. We're proud of how our hard work and commitment sets us apart and benefits society, every day. We're looking for new team members who share our values and are ready to take on exciting challenges. The opportunity The Project Construction Management team is evolving to meet the needs of our growing business. We are seeking an exceptionally skilled leader who has knowledge and experience in construction management and inspection of facilities and/or pipeline. The success candidate(s) will lead a team of field based construction managers, inspectors and associated office support in Facilities, Field, Safety, Environment and Welding inspection in the Canadian Gas business unit, reporting to the Manager, Project Construction Management. The role will include work assignments, employee development and training, all performance management aspects, workload analysis, succession and resourcing plans. You will work a regular work week with normal business hours, but will travel regularly (up to 50% overnight travel) within Canada from time to time. There are two opportunities for this role. What you'll do

- Identify and implement opportunities to improve process efficiency and reduce project life cycle costs
 - Develop and manage annual business plans and associated budgets and prepare and present management reports and statistics
 - Provide input into strategic direction and consultation regarding all aspects of construction management and inspection for the wider organization
 - Deliver presentations to the management teams demonstrating team effectiveness
 - Participate in leadership meetings and assist with strategy development for selection inspection personnel to ensure the appropriate level of resources are assigned to each project and maintained within the staffing plan
 - Ensure all Quality, Safety, Health and Environmental Rules/Commitments are being carried out
 - Regularly visit project sites to assess quality and safety performance and adherence to the Company's policies and procedures
 - Communicate and collaborate with project stakeholders including project managers, employees, management, etc.
 - Represent the Company on external industry committees and establish effective relationships with applicable regulators and external stakeholders
- Minimum Qualifications
- Minimum of fifteen (15) years of related experience within the natural gas industry and construction
 - Ten (10) years of informal or direct leadership experience
 - Experience managing project budgets, capital and operations management

- Ability and willingness to travel 50% while conducting field visits and attending various seminars and business meetings

• Preferred Qualifications

- Minimum of a technical trades certification additional post-secondary education would be an asset

- Strong knowledge and understanding of construction practices with respect to natural gas facility projects;
- Strong business acumen and construction management skills / experience
- Excellent people and leadership skills with the demonstrated ability to create and maintain a successful team at a high functioning level
- Ability to interact, communicate effectively (written and verbal) and collaborate at various levels of the organization (e.g. field workers, stakeholder groups, management, senior leadership)
- High degree of understanding safe work habits and procedures and legislations
- Willingness and motivation to learn and develop new skills
- Demonstrate knowledge in pipeline integrity work and construction activities
- Ability to respond to emergencies while being available during normal business hours

• • • *This position requires candidates to:

- drive a motor vehicle. • Following a conditional offer of employment, the Company will check the motor vehicle records of any job applicant when driving is an essential job function.

- successfully complete a pre-employment medical screening, including drug and alcohol testing.

• About our businessOur 92,600-kilometre (57,500-mile) natural gas pipeline network is positioned in two of the most prolific and lowest cost basins in North America - the Western Canadian Sedimentary Basin (WCSB) and the Appalachian Basin. Our systems are well placed to meet the continent's growing demand for clean-burning natural gas by connecting the supply in these basins to important and growing markets across the continent. We supply more than 25 per cent of the clean-burning natural gas consumed daily across North America. • The Coastal GasLink natural gas pipeline project will run approximately 670 km (416 miles) in length. The proposed pipeline will safely deliver natural gas from the Dawson Creek area of northern B.C. to a facility near Kitimat, B.C., where it will be converted to a liquid form for export by • LNG Canada. From there, it can be shipped to markets in Asia that are currently powered by coal-fired electricity - a significant source of greenhouse gases. In addition to helping deliver cleaner energy to our planet, construction of this important line is projected to create between 2,000 and 2,500 jobs, generate property tax revenues and give an economic boost to communities in northern B.C.
