

# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Link's Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

### Description

We are looking for an IT professional with procurement and project management expertise!

Come join our team at the Enterprise Applications Branch of the Central Agencies I&IT Cluster, where you will lead project teams in the development, implementation, and maintenance of cost-effective information technology solutions and services.

Note: This position is located at 33 King Street West, Oshawa and/or 222 Jarvis Street, Toronto; however, alternate work arrangements, including flexible hours, hybrid remote work, and a compressed work week, may be available.

OPS Commitment to Diversity, Inclusion, Accessibility, and Anti-Racism:

We are committed to build a workforce that reflects the communities we serve and to promote a diverse, anti-racist, inclusive, accessible, merit-based, respectful and equitable workplace.

We invite all interested individuals to apply and encourage applications from people with disabilities, Indigenous, Black, and racialized individuals, as well as people from a diversity of ethnic and cultural origins, sexual orientations, gender identities and expressions.

Visit the OPS Anti-Racism Policy < <https://www.ontario.ca/page/ontario-public-service-anti-racism-policy> > and the OPS Diversity and Inclusion Blueprint < <https://www.ontario.ca/page/ops-inclusion-diversity-blueprint> > pages to learn more about the OPS commitment to advance racial equity, accessibility, diversity, and inclusion in the public service.

We offer employment accommodation across the recruitment process and all aspects of employment consistent with the requirements of Ontario's Human Rights Code < <http://www.ohrc.on.ca/en/ontario-human-rights-code> >. Refer to the application instructions below if you require a disability-related accommodation.

What can I expect to do in this role

In this role, you will:

- provide team leadership in the technical design, development, and implementation of complex technical solutions and applications
- provide technical systems development expertise to meet the business areas' IT requirements
- prepare/contribute to requests for proposals (RFPs), coordinate tenders, and participate in the review and selection of contractor submissions
- provide advice to business areas on I&IT policies and procedures, and on appropriate use and efficient application of information technology
- act as a resource in the resolution of technical problems
- coordinate/conduct technical training for staff and users

Location: Oshawa, Toronto

How do I qualify

Technical Knowledge and Skills

- You have knowledge of technology platforms, system technologies such as operating systems, both custom application software, client customized software and networks, internet, and emerging technologies
- You have advanced knowledge of theory and principles of systems design and development, programming concepts and languages, and related methods, techniques, practices, and standards
- You have advanced knowledge of database management systems and application database administration
- You have demonstrated knowledge of, and experience in, the theory/principles of systems analysis, design and development, along with database management systems (e.g. MySQL, Cosmos DB, SQL/PostgreSQL) and optimization of Microsoft SQL Server, including the Business Intelligence suite of tools
- You have experience and expertise as a programmer (e.g. .NET, RESTful API, Angular 9+, SharePoint/SharePoint Online) using a variety of languages and database technologies (e.g. SQL, Cosmos) in a Windows environment
- You have extensive hands-on development experience in Azure and troubleshooting experience on Azure App services
- You have experience identifying, documenting and evaluating technical options and developing system and application program specifications

Procurement and Project Management Skills

- You can ensure compliance of recommendations on acquisition of technology and services and negotiation of contracts
- You can recommend systems development solutions to promote strategies and goals, and meet business needs and priorities of the client
- You can determine plans and schedules for implementation of system enhancements and upgrades
- You can recommend system development initiatives and short- and long-term system development plans
- You can determine system performance standards and recover/backup procedures
- You can recommend selection of vendors' proposals related to various tendering processes

Analytical and Evaluation Skills

- You can assess business area's information and systems' needs and lead the development of cost-effective information technology solutions to

improve business area program and service delivery

Communication and Leadership Skills

- You can discuss business area requirements, lead discussion of systems development options and technical processes, and provide solutions and recommendations
- You can prepare business cases, RFPs, contracts, and project reports
- You can coordinate the development of technical project plans, control project processes, and provide technical leadership
- You can work effectively with colleagues and clients

Salary Range: \$1,498.23 - \$1,935.44 Per Week

Additional information:

- 1 Permanent, 222 Jarvis St, Toronto, Toronto Region or 33 King St W, Oshawa, Central Region
