

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Ministry of Forests, Lands, Natural Resource Operations and Rural Development

This position is located in Kamloops, B.C. Other Ministry office locations may be considered, subject to operational requirements and space availability at time of offer.

Vegetation Resources Inventory Ground Sampling Forester

\$68,008.54 - \$85,592.73 annually

The Ministry of Forests, Lands, Natural Resource Operations and Rural Development delivers holistic resource management services for British Columbians and has a mandate to manage specified Crown land and resources in a manner that embraces the economic, environmental and social goals of government.

The primary responsibility of the Ministry's Forest Analysis and Inventory Branch is to provide forest analysis and inventory information to assist in meeting the Resource Stewardship Division's stewardship mandate, the Chief Forester's statutory responsibilities, and critical information needs of the Ministry and the natural resource sector. The Branch's two key programs (Forest Analysis and Forest Inventory) provide critical forest analysis, inventory data, strategic direction, and policy support to enable sustainable forest resource management and the determination of allowable annual cut for timber supply areas and tree farm licence areas. The Branch also contributes to informing management and decision making by providing information and analysis that help explore the implications associated with a wide range of current and evolving resource issues and practices.

The Vegetation Resources Inventory Ground Sampling Forester is responsible, along with other Forest Analysis and Inventory Branch ground sampling specialists, for the delivery of Forest Analysis and Inventory Branch ground sampling projects (which include young and mature stand monitoring, permanent sample plots re-measurements, audit sampling, and sampling to support the implementation of new LiDAR-based inventories), development and support of the new field data collection tools, the development and maintenance of ground sampling standards and manuals, and the management of, and reporting on, sample data. The Vegetation Resources Inventory Ground Sampling Forester supports and liaises with federal government inventory specialists, timber supply analysts, academia, and licensees. Qualifications for this role include:

• A Bachelor of Science Degree in Forestry or related discipline and a minimum of three years of directly related forest inventory experience; or, an equivalent combination of education and experience, such as an allied degree or pupil program and related experience.

• Registered, or immediately eligible for registration, with the Association of British Columbia Forest Professionals as a Registered Professional Forester.

• Experience with analyzing/processing inventory, growth and yield or experimental ground sample data. Preference may be given for 3 or more years of experience.

• Computer experience manipulating forest sample data. Preference may be given for 3 or more years of experience.

• Demonstrated field experience measuring forest samples or related activity.

• Experience in consulting/negotiating solutions in natural resource management.

• Preference may be given for Vegetation Resources Inventory ground sampling certification.
