Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description
Working at CBC:
At the CBC, we all have a story to tell. Whatâ€™s yours
If you share our passion for Canadian storytelling and you wish to help us engage with individuals and communities across our various digital platforms, this is where youâ€™ll want to be!
Every day, you will have an opportunity to shape the way in which Canadians see themselves reflected in our digital services. Your work will have a direct impact on how millions of Canadians from various communities connect with our products, with one another, and with the diverse voices that make our country so unique.
You will have the opportunity to play a part in enlightening and entertaining Canadians through our innovative work in building the mediums that deliver our content. We are an innovative hub, where the talented professionals we work with are respected and valued for their contributions. Our product teams are vibrant and our work culture strives to achieve the highest standards of diversity and inclusion. We believe that hiring people with different career paths and backgrounds is fundamental in our shared success and in building healthy and highly performant teams. When you join our mission, you are not only shaping the vision of the CBC, but the future of our country.
Why is this role important
CBC Digital Products is on a mission to harmonize two technology stacks and build an over-the-top (OTT) media streaming offering for both our English and French services. Based in both Toronto and Montreal, the innovative and collaborative OTT team is creating the next generation of video-streaming experience for both English and French-speaking Canadians, as well as the internal systems used for content management, customer relations, and data analytics.
Reporting to the Senior Manager, Digital Products, and working under the direction of the Senior Manager, OTT Harmonization, we are adding an Android Developer to the Toronto team. This is a contract opportunity ending March 31st, 2022. Currently our team is working remotely with the requirement to be in-office once the Covid-19 pandemic restrictions are lifted and it is deemed safe for us to be together.
This is an end-to-end project working on an exciting and innovative product that will draw data generated by and provide service to millions of Canadians. You will design, develop, test, and roll

out apps for both our ICI-TOU.TV and GEM video streaming services encompassing a shared codebase with different themes, displays, menus, integrations, and tracking.

Here's why we should work together:

Our digital teams' values - collaboration, learning, and continuous improvement - embody who we are as a people-focused, digital-forward employer. We follow lean startup principles and use an Agile approach. Our dedicated people managers work closely with every individual to ensure we are leveraging their strengths, championing their ideas and supporting their pursuit of new skills and their desired career progression.

Here at CBC Digital Strategy & Products, we want you to be happy and feel good at work. It is essential that work be a safe space where our employees are able to share their authentic selves with one another and to push each other to challenge conventions.

Perks you can look forward to:

Flexible work schedules, allowing you to prioritize yourself, your family and your work;

Work from home opportunities;

Competitive total rewards package;

20% of time for innovation, learning and development; wherever your interests lie;

Opportunities to work with cutting edge technology;

Opportunities for continued learning and professional development;

Opportunities to become a member of our Employee Resource Groups;

Pair programming and mentorship opportunities, where you can learn from the best in the industry and help coach new talent;

A creative and dynamic work environment, where your ideas and contributions can be heard, valued and respected;

A supportive management team committed to upholding the highest standards of diversity and inclusivity;

An environment which favours experimentation and an iterative approach in order to achieve the highest form of technical innovation.

How you will make an impact:

You will contribute to our core product set, which includes:

The CBC and Radio-Canada OTT native Android apps for ICI TOU.tv and CBC Gem.

A high-quality video playback experience for our users.

Integration with a backend system that stores and retrieves media, metadata, subscriptions, user information, and lineups.

You will help develop our tech stack, which includes:

Native Android codebases (Kotlin with legacy Java), components, and frameworks that are shared across multiple applications.

Backend components and systems built using Node.js, Java, C#, MongoDB.

Native unit test integrations and evolving automation frameworks.

You will create reactive layouts adaptable to both languages and resize to accommodate different displays.

Education Requirements

A degree in Computer Science, Engineering, degree, or the equivalent is preferred, but we know not everyone gains their app development skills this way.

Essential Skills

What you could bring to our team:

The expertise. You have hands-on experience developing enterprise-level mobile applications serving up large quantities of data connected to big backend services. You can defend your ideas and challenge ours. The experience. You have experience with build processes and an understanding of continuous integration and the full mobile development life cycle, including publishing to the Google Play store.

The technical knowledge. You have hands-on expertise writing maintainable code based on clean architecture principles. You can:

Develop in Kotlin.

Request and parse data from REST APIs.

Use both old and new Android libraries.

The collaborative approach. You understand the concepts of collective responsibility and ownership. You are an excellent communicator who practices active listening and empathetic engagement across diverse perspectives.

The quality mindset. You are passionate about delivering high-quality products. You understand modern approaches to testing, unit testing, manual test case execution (including the unique challenges in native mobile environments) - and when to best deploy them.

The bonus skills:

Experience working with apps built in Java, building iOS apps, or working with web technologies.

Experience working within an Agile setting, collaborating with Product Owners and Product Managers to iteratively deliver and innovate product solutions.

Ability to communicate in both French and English is an asset.
