Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Integrations Service Specialist Lead

The Integrations Service Specialist Lead is responsible for supervising a new team of Integration Service Specialists. The team is responsible for providing integration services development, testing, deployment, and advisory services using agile methodologies and practices for the sectors many business units. Additionally, the work focuses on the reliability and continuous improvement of software product stability in support of ministry or government strategic and operational goals. The Integration Service Specialist Lead combines software and systems engineering to build and run at scale, distributed and fault-tolerant software products.

Qualifications for this role include:

- Bachelor's degree in Computer Science or equivalent combination of education and experience may be considered.

- Minimum of two years' experience with continuous integration, continuous delivery and continuous deployment principles.

- Minimum of two years' experience analyzing and troubleshooting systems, monitoring availability and practicing complete view of system health, maintenance, and reliability.

- Minimum of two years' experience with providing guidance and implementing infrastructure solution to reduce the workload by automation.

- Minimum of two years' experience in all or some of the following:

o API development and integration and continuous development environments.

o Pipeline management with tools like Jenkins and similar continuous integration technologies.

o Version control technologies such as subversion and Git and development in an open source environment.

o Implementing "Infrastructure as Code" using tools like Terraform and Ansible for leveraging

GitOps approaches for automating infrastructure

o Experience working in an agile development environment with User Experience (UX) teams, designers and developers to iteratively create or improve digital products and services from conception to production.

o Experience working with metrics and monitoring technology like: Splunk, Promethus, Graphana, Sysdig, Cerebus, Kraken, and Matomo.

o Experience with Unix/Linux operating systems internals (e.g. filesystems, system calls), and with networking (e.g. routing, ESDN) or cloud systems.

o Experience of J2EE Web development and applications, including Spring Framework, Hibernate, Oracle, Postgres and Wildfly.

o Experience working with OpenShift Platform environments
