

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

IS Business Analyst - SAP Plant MaintenanceReference Code: 61105

Location: Canada (CA) - Calgary, AB Job Category: Information Technology/SystemsEmployment Type: Employee

Full-timeRelocation Eligibility: This position is not eligible for our relocation programApplication Deadline: 06/22/2020

We all need energy. It warms our homes, cooks our food, gives us light, and gets us where we need to go. It also improves our quality of life in countless other ways. At TC Energy, our job is to deliver that energy to millions of people who depend on it across North America. And we take our job very seriously.

Guided by our values of safety, integrity, responsibility and collaboration, we develop and operate our facilities safely, reliably and with care for our impact on the environment. With our presence across the continent, our people play an active role in building strong communities.

We're proud of how our hard work and commitment sets us apart and benefits society, every day. We're looking for new team members who share our values and are ready to take on exciting challenges.

The opportunity

The energy industry is primed for digital disruption, and we're excited about the opportunities ahead. We are leading the digital transformation journey by unlocking creativity and innovation in new ways, every day. If you're ready to challenge the status quo to deliver outstanding business results that propel us into the future, we want you to join our team!

Our IS Construction & Maintenance Management team is evolving to meet the needs of our growing business and we are expanding our presence in Calgary, Alberta to support the Information Services department. The team is responsible for the design, development and support of TC Energy's business processes with our portfolio of SAP applications and enterprise cloud service solutions to enable the organization to deliver on its growth strategy. We are seeking an innovative Business Analyst who has knowledge and experience partnering with the business to provide fit for purpose solutions that will help drive our department to enable business outcomes. In this role, you will be responsible to configure and lead enhancement projects focused primarily in TC Energy's SAP Plant Maintenance module.

What you'll do

- Responsible for leading support, enhancements and solution delivery of SAP Plant Maintenance (PM) functionality to meet business requirements
- Analyze processes and drive recommendations for changes to support business process improvements
- Maintain and grow relationships with Business Partners; ensuring IS applications are enabling the business to meet or exceed operational goals, to provide updates to inflight IS deliverables, and ensure priorities are aligned to the technology roadmap
- Plan, perform and coordinate unit, integration and user acceptance tests
- Collaborate with the Development Team members in the design and testing of interfaces, enhancements, reports and data conversions for operational and project related deliverables
- Deliver SAP configuration and product knowledge to help support business and project objectives
- Engage with a diverse group of stakeholders including development teams, security, reporting, master data, projects and change management teams
- Prepare and maintain relevant documentation (e.g. functional specifications, training materials)

- Where required, provide tier 3 level support and guidance for SAP and related applications
- Coordinate incidents to resolution through the ServiceNow application
- Technical coaching and mentorship of junior team members and contract personnel
- Work with external vendors in coordinating support and TC Energy testing requirements
- Other tasks as required

Minimum Qualifications

- Bachelor's Degree in Business, Computer Science or related discipline from a recognized institution is a requirement
- Minimum of six (6+) or more years of relevant working experience is required
- Advanced functional experience (configuration) in SAP Plant Maintenance module
- Previous experience deploying solutions to field operations using mobile technologies (i.e. SAP Work Manager)
- Intermediate to advanced experience and proficiency with various business software applications (SAP, Microsoft Excel, SharePoint, MS Office Suite, Visio, Power BI)
- Ability to build effective relationships and communicate with team members, business partners, external vendors, and key stakeholders at various levels through facilitation and presentations
- Exceptional analytical, prioritization and organizational skills, using critical thinking to work through complex problems
- Motivated problem solver who can work efficiently and effectively and individually lead projects to resolution
- Strong skills in leading/facilitating business requirements and business process mapping sessions with diverse groups

Preferred Qualifications

- Knowledge of integration to other SAP functional modules (PS, FICO, HR and MM) is preferred
- Experience implementing solutions in the Quality Management and Audit Management SAP modules
- Understanding and working knowledge of database relationships and the set-up Client/Server applications is considered a strong asset
- Certification in Lean Six Sigma is considered an asset
- Experience and demonstrated acumen with a keen interest for the energy industry and TC Energy's operations
- Outcome-obsessed with demonstrated ability to identify the current state situation, design the future state, and manage any gaps in solution delivery
- Desire to be part of a dynamic team, within a fast-paced and growth-oriented environment where change occurs continuously
- Strong conflict management and issue resolution skills
- A process and systems thinker who understands interdependencies and can design and refine solutions with these in mind

About Information Services

We're driven by the relentless delivery of bottom-line benefits, utilizing talented people, nimble process and the right technology. We're focused on outcome-based innovation and committed to be an idea factory with our business partners. We define success as the delivery of impactful, innovative solutions, not the deployment of technology. #LI-TM1 Apply now! Apply to this posting by 06/22/2020 using reference code 61105.
