

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Electrical Instrumentation and Controls Technician - Agassiz Area, Ile des Chenes, MB Reference Code: 62383

Location: Canada (CA) - Ile des Chenes, MB

Job Category: Operations; Trades/Technical

Employment Type: Employee Full-time

Relocation Eligibility: This position is eligible for our domestic relocation program

Application Deadline: 01/21/2020 We all need energy. It warms our homes, cooks our food, gives us light, and gets us where we need to go. It also improves our quality of life in countless other ways. At TC Energy, our job is to deliver that energy to millions of people who depend on it across North America. And we take our job very seriously. Guided by our values of safety, integrity, responsibility and collaboration, we develop and operate our facilities safely, reliably and with care for our impact on the environment. With our presence across the continent, our people play an active role in building strong communities. We're proud of how our hard work and commitment sets us apart and benefits society, every day. We're looking for new team members who share our values and are ready to take on exciting challenges. The opportunity TC Energy is seeking a skilled Electrical Instrumentation & Controls (EI&C) Technician to join our Canada Gas Operations team in Ile des Chenes, MB. Reporting to the Agassiz Area Manager, as an EI&C Technician we will rely on you to repair, install, troubleshoot, and perform other planned maintenance and corrective tasks on assigned electronic, pneumatic and/or mechanical control systems, devices, and ancillary equipment. In this role you will also operate and maintain natural gas compression and auxiliary equipment, in a manner that meets operational needs, in compliance with company and regulatory requirements. You will maintain core operational task qualifications and perform tasks from other disciplines. You will be surrounded by a competent, compassionate team of hard-working individuals who are passionate about your success. You will thrive in our environment if you are open, honest, willing to learn, and eager to pitch in to support all activities related to pipeline operations. This position is overtime eligible, part of an on-call rotation and provides emergency support as required. Some travel will also be required. The regular work schedule for this position will be: Week 1 - Monday to Thursday 9 hours / day; Friday 8 hours / day Week 2 - Monday to Thursday 9 hours / day; Friday is a Regular Day Off (RDO) What you'll do

- Independently perform installation, testing, repair, and maintenance of compressor station equipment, and other facilities relevant to the pipeline system
- Troubleshoot, test, and maintain including but not limited to shutdown devices, fire and gas systems, auxiliary systems, HVAC systems, relieve and Over Pressure Protection devices, control valves, PLC's and control systems.
- Install and configure software in control systems
- Perform routine and major maintenance on gas turbine packages, gas compressor units, meter station asset equipment and associated auxiliary equipment, assist with pipeline asset maintenance
- Perform emergency repairs to meet customer and client needs
- Oversee the safe and efficient completion of projects
- Ensure facilities and personnel comply with TC Energy's safety, health, environment, and risk standards
- Oversee contractors
- Mentor junior employees
- Procure resources and manage within budgets for the facilities

- Provide support to our business partners

Minimum Qualifications

- High School diploma or equivalency (GED) is required
- Fully certified Journeyman Industrial Instrumentation Technician/Technologist
- Minimum 5 years of industrial experience
- An alternate combination of education and experience may be considered

Preferred Qualifications

- Instrumentation experience would be considered an asset as this is a cross-functional operations area
- Experience working with high pressure natural gas
- Fully competent and current with all Health, Safety and Environment standards and training
- Excellent analytical and troubleshooting skills
- Mechanical aptitude
- Competent using equipment applicable to the maintenance of control systems
- Highly motivated with interpersonal skills to effectively work in a collaborative team environment that includes shared responsibilities
- Current with technological advances in the compression field
- Familiarity with SAP and Microsoft Office suite (Excel, Word, Outlook)
- Demonstrated effective written & verbal communication skills

*This position requires candidates to:

- Have and maintain a valid driver's license
- Provide a driver's abstract for review
- Successfully complete a pre-employment medical screening, including drug and alcohol testing
