

# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce Canadian Indigenous Job Seekers to a new approach to job searching. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Canadian Indigenous Peoples with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

### Description

Closing Date (MM/DD/YYYY): 06/30/2021

Worker Type: Permanent

Language(s) Required: English

Passion for clean, smart code required.

Accountable for the development of FCC's technical solutions including the design, development, testing and deployment of code, and interpretation of business requirements.

You will design and develop extensible and responsive web applications using Angular and Bootstrap, and write backend service frameworks using Java, Spring and Hibernate.

This Senior Developer also provides informal leadership while developing complex components of a solution.

What you'll do:

- Analyze and develop new code including automation, integration and unit tests
- Implement code fixes and support user testing
- Participate in and/or lead design sessions
- Actively contribute to code reviews providing constructive feedback to team members
- Ensure technical solutions and system integrations are developed and maintained in the most efficient and effective manner

What we're looking for:

- Proficient in a chosen technology stack
- Communicates moderate to complex technical concepts to technical and non-technical personnel
- Ability to conceptualize and articulate ideas clearly and concisely
- Ability to design and implement functional, easy to use frameworks
- Innovative problem-solver and critical thinker with a customer focus
- Advocate of smart, clean and maintainable code
- Passion for technology and software development

What you'll need:

- Bachelor's degree in computer science or engineering and at least six years of related

experience (or an equivalent combination of education and experience)
