

# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

**Company** TC Energy

**Location** Calgary, AB

**Date Posted** From: 2021-04-13 To: 2050-01-01

**Job** Type: Full-time Category: Resource Sector

### Description

Senior Cybersecurity Analyst Reference Code: 75543 Location: Canada (CA) - Calgary, AB

Job Category: Information Technology/Systems

Employment Type: Employee Full-time

Relocation Eligibility: This position is not eligible for our relocation program

Application Deadline: 04/28/2021 We all need energy. It warms our homes, cooks our food, gives us light, and gets us where we need to go. It also improves our quality of life in countless other ways. At TC Energy, our job is to deliver that energy to millions of people who depend on it across North America. And we take our job very seriously.

Guided by our values of safety, integrity, responsibility and collaboration, we develop and operate our facilities safely, reliably and with care for our impact on the environment. With our presence across the continent, our people play an active role in building strong communities.

We're proud of how our hard work and commitment sets us apart and benefits society, every day. We're looking for new team members who share our values and are ready to take on exciting challenges.

The opportunity

The Cybersecurity Analyst position reports to the Manager of Cybersecurity Identity, Defense / Response, and Architecture. In collaboration with business partners and partner teams across Information Systems (IS), you will be responsible for identifying and responding to cyber security incidents, ensuring appropriate threat mitigation, and continuously improving our detection and response capabilities.

Key accountabilities for this role will include: Leading and optimizing all aspects of security operations, mentoring junior security analysts, and delivering best in class cyber protection for our organization.

What you'll do

- Maintain, execute, and improve the Cybersecurity Incident Response process
- Develop, execute, and improve processes for daily IS cybersecurity operation activities
- Identify patterns and trends in security events that could lead to security incidents
- Effectively communicate threat information and system status to leadership and stakeholders
- Establish use cases for implementing new Indicators of Compromise (IoCs) to provide actionable

alerts

- Develop and implement key performance indicators and other metrics as it relates to IS Cybersecurity operation activities
- Develop, document, maintain and operationalize on-going threat and vulnerability management activities
- Lead and mentor junior security analysts in all aspects of security operations
- Develop, maintain, and improve standards and requirements related to operational security;
- Participate in projects related to the deployment of IS Cybersecurity operations tools and practices

#### Minimum Qualifications

- Four-year Degree in Computer Science, Engineering, Cybersecurity or related area
- Minimum 10 years directly related experience with a focus on information security
- Obtained or demonstrates an active pursuit of one or more of the following certifications: Information Systems Security Professional (CISSP), Certified Information Security Manager (CISM), Certified Information Systems Auditor (CISA), Certified Risk Information System Control, (CRISC) certifications, or other related certifications
- 5 years of Cybersecurity experience in the following areas would be beneficial:
  - Cybersecurity analyst in large and regulated organizations
  - SIEM operation and maintenance with Splunk or similar product
  - Daily activities involved in large SIEM operational environment and experience working with Managed Security Service (MSS) providers
  - Developing use cases for security incident detection and the implementation of correlation rules and alerts
  - Implementing, maintaining, and operationalizing threat and vulnerability management
- Excellent interpersonal, written and oral communication skills and ability to communicate in both technical and non-technical language with all levels of staff and management
- Demonstrated ability to identify requirements/needs, assess solutions and provide recommendations
- Demonstrates an ability to work in a collaborative environment and influence others
- Highly passionate and self-motivated
- Excellent grasp of the latest Indicator of Compromise (IoC) and malware trends
- Experience developing Security Incident Response and daily SIEM operations processes

#### Preferred Qualifications

- Proofpoint, Splunk, PaloAlto Firewall/Endpoint and Microsoft Security Suite Administrator qualifications are a plus
- Experience in Computer forensic is a plus
- Experience developing and /or participating in RFP for SIEM third party services is a plus
- Experience in organizations that support SCADA networks, pipeline operations, and Industrial Plant Control systems is a plus

#### About our business
