Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Senior Business Analyst

Position Description

CGI offers more than a job. We offer limitless opportunities to make a difference for the clients and communities we serve. Come join committed, skilled and passionate people just like you! We support our members' career aspirations, offering learning initiatives and provides access to our global health and wellness program. We also offer competitive salaries and benefits such as our share purchase plan, a profit-sharing program, flexible schedules that guarantee a good work-life balance!

This is a superb opportunity to become a member of CGI Calgary to provide leading information technology services to our clients. We are seeking a Senior Business Analyst who has a minimum of 10 years' experience in an IT environment, including 5 years of application development experience. Your future duties and responsibilities

- Resolve through reading documentation and interactive sessions with clients the business needs to be satisfied by new or improved IT applications

- Use business process and data modeling techniques and tools to capture and analyze requirements

- Formally detail findings and present proposed solutions to clients

- Provide Business Analysis support for Agile projects

- Write high level functional and non-functional requirements

- Develop use case views and use cases

- Prepare and maintain project work according to CGI's ISO certified processes

- Play a lead role in the development of business requirements documentation

- Facilitate requirements workshops with clients and team members

- Optimally partner with and communicate requirements to technical team members

- Participate in defining and potentially executing some aspects of system testing and quality assurance

- Assist in defining estimates

- Mentor and provide leadership to other business analysts

- Ensure Business Analysis tools, processes and techniques are current to industry standards
- Participate in and occasionally lead delivery of IT projects

May be required to:
- Assist in developing project plans for the related tasks of a project and proposed solution options with costs/benefits
- Assist in crafting logical, physical data models and storyboards.
- Lead or participate in requirements capturing workshops
- Develop and implement test cases
- Provide application training

Required qualifications to be successful in this role
- Business process analysis and modeling experience
- Requirements capturing and analysis experience in large business or government settings
- Excellent written and verbal communication skills and strong interpersonal skills
- Ability to work in a fast-paced team environment with multiple priorities
- Ability to perform efficiently under limited supervision
- Strong collaborative, analytical, problem solving and time leadership skills
- Experience working with senior management and - operational staff

Nice to Have:
- Microsoft Visio
- Data modeling
- Microsoft Project
- Experience with testing; including test planning, execution, and reporting

Education:
- Degree / Diploma in Computer Science, Business Administration or related equivalent
- Certified Business Analyst Professional (CBAP); or Certified Capability in Business Analysis (CCBA)
