

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Manager, North Cogeneration & StorageReference Code: 83322 Location: Canada (CA) - Edmonton, AB

Job Category: Management; Operations; Trades/Technical

Employment Type: Employee Full-time

Relocation Eligibility: This position is eligible for our domestic relocation program

Application Deadline: 04/22/2021 We all need energy. It warms our homes, cooks our food, gives us light, and gets us where we need to go. It also improves our quality of life in countless other ways. At TC Energy, our job is to deliver that energy to millions of people who depend on it across North America. And we take our job very seriously.

Guided by our values of safety, integrity, responsibility and collaboration, we develop and operate our facilities safely, reliably and with care for our impact on the environment. With our presence across the continent, our people play an active role in building strong communities.

We're proud of how our hard work and commitment sets us apart and benefits society, every day. We're looking for new team members who share our values and are ready to take on exciting challenges.

The opportunity

The Manager, North Cogeneration & Storage reports to the Director, Operations Power & Storage and will be based out of the TC Energy Edmonton field office. The successful candidate will be responsible for the safe, reliable, and strategic operation and maintenance of the Edson Gas Storage Facility, the MacKay Cogeneration Facility, and the Bear Creek Cogeneration Facility. Additional duties also include collaboration with various departments, assistance with the development and implementation of asset optimization/performance strategies, ensuring compliance to all internal and external requirements, budget planning and forecasting, and staff development. The individual in this position will also act as an interface with TC Energy Commercial Gas Storage and Power teams. The successful candidate will be available after normal work hours and weekends, as required.

*This position requires successful candidate to:

- Have and maintain a valid Driver's License
- Provide a Driver's Abstract for review
- Successfully complete a pre-employment medical, including drug and alcohol testing
- Travel occasionally and meet requirements including appropriate documentation necessary to travel to the USA on business for training, meetings, and to attend conferences What you'll do
- Provide leadership to continuously improve your teams' performance in terms of health, safety and environment, compliance, reliability and productivity/plant availability
- Ensure compliance with all relevant federal, provincial, and local regulatory requirements and company policies and procedures pertaining to maintenance
- Understand and manage facility risks, reliability, availability and performance
- Understand and incorporate the commercial contracts and obligations of the facilities
- Effectively manage all resources, including people, finances, materials and time to ensure maximum efficiency in planning, forecasting, implementation and plant availability
- Develop and foster an environment which actively enables and encourages employee innovation, continuous improvement, and commitment to operational excellence
- Plan, forecast, manage and report on the plant operations and maintenance budget
- Manage and coordinate emergency response with a requirement to attend the plant during emergency and outage situations
- Build and develop a strong, competent, proactive, and engaged team
- Develop individual training plans for your team members
- Provide your team with excellent performance feedback, appropriate rewards, recognition, and coaching
- Ensure that company resources are effectively utilized to improve reliability and availability of our facilities and to support regional operations
- Contribute to department and companywide objectives and initiatives
- Work collaboratively to establish the department, site and team strategies, goals, and business plan
- Represent the company and foster critical partnerships both internally and externally
- Be a champion for continuous improvement and change management

Minimum Qualifications

- Post-secondary education in a relevant field
- Relevant Red Seal trade certification such as Mechanical/Electrical/Instrumentation, First Class Power Engineer, Professional Engineer or a combination of the preceding certifications
- 15+ years of experience in the operation & maintenance of power generation facilities, and/or gas storage facilities

- Minimum 5+ years of experience in a leadership and/or management position
- A combination of education and work experience may be considered Preferred Qualifications
- Demonstrated leadership in the areas of health, safety and environment, change management, employee development, and performance management
- Strong power plant and/or gas storage operational and maintenance background with business acumen ability to drive short- and long-term goals and objectives
- Ability to lead and direct employees in performing day to day activities and long-term initiatives
- Demonstrated leadership and management skills with diverse work groups
- Exceptional interpersonal and written communication skills and networking ability
- Competent with MS Office suite of products and demonstrated ability to attain competency with customized software products
- Advanced analysis and problem-solving abilities coupled with strong decision-making skills
- Ability to adapt positively to a changing environment
- Experience with conflict resolution and problem-solving tools and processes

About our business

TC Energy's portfolio of high-quality, long-life energy infrastructure assets now includes investments in seven power generation facilities with a combined generating capacity of approximately 4,200 megawatts (MW) — enough to power more than 4 million homes. Approximately 75 per cent of our power capacity is emission-less and we are leaders in the development and operation of high-efficiency, natural gas-fired generating stations. Apply now! Apply to this posting by 04/22/2021 using reference code 83322. You must apply through our jobs system at jobs.tcenergy.com. Only applications submitted through our system will be acknowledged. Applications may be submitted using a mobile device or a desktop / laptop computer. TC Energy is an equal opportunity employer.
