

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Link's Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Manager, Corrosion Prevention Programs ImplementationReference Code: 88914 Location: Canada (CA) - Winnipeg, MB

Job Category: Management; Operations

Employment Type: Employee Full-time

Relocation Eligibility: This position is eligible for our domestic relocation program

Application Deadline: 08/03/2021 We all need energy. It warms our homes, cooks our food, gives us light, and gets us where we need to go. It also improves our quality of life in countless other ways. At TC Energy, our job is to deliver that energy to millions of people who depend on it across North America. And we take our job very seriously. Guided by our values of safety, integrity, responsibility and collaboration, we develop and operate our facilities safely, reliably and with care for our impact on the environment. With our presence across the continent, our people play an active role in building strong communities.

We're proud of how our hard work and commitment sets us apart and benefits society, every day. We're looking for new team members who share our values and are ready to take on exciting challenges.

The opportunity

The Corrosion Prevention (CP) program for TC Energy oversees all aspects of our Cathodic Protection asset performance across the country. As the Manager, Corrosion Prevention Programs Implementation, you will be accountable for leading a team of approximately 20 certified corrosion technicians and 60 seasonal contractors that are responsible for implementation of the CP annual and technical survey programs safely, efficiently and with minimum impact to operation. Reporting to the Central Region Director, your role is essential in maintaining productive relationships with other Operational Directors, Area Managers, and Construction Contractors supporting the corrosion program. You will be expected to support collaboration with Program Managers, Project Managers and Engineers across the country to ensure the safe implementation and completion of the program.

This position requires candidates to:

- Extensively travel across Canada (approximately 40% travel)
- Have and maintain a valid Driver's License
- Provide a Driver's Abstract for review
- Successfully complete a pre-employment medical screen including drug and alcohol testing

What you'll do

- Safely deliver quality work
- Provide leadership to continuously improve business performance in terms of health, safety and environment, costs, maintenance practices, and customer services
- Understand and implement Operations and Engineering Strategies
- Lead a multi-discipline team of corrosion technicians, contractors and summer students to implement the large and challenging Cathodic Protection Program for Canada Gas, Liquids and Energy (BU)
- Develop and foster the environment that actively enables and encourages employee innovation, continuous improvement, and commitment to operational excellence
- Maintain productive relationships with regional leaders and strategic CP vendors and support continuous improvement in their performance
- Support CP technology development and improvement to enhance the effectiveness of CP program implementation
- Provide oversight leadership and coordination of vendors and supporting contractors
- Establish and maintain strong relationships with all stakeholders to enable close alignment on business objectives and deliverables and improve efficiency
- Provide leadership and oversight to the cohesiveness of the team
- Provide leadership over the training and development of Corrosion technicians and succession planning
- Build and lead a high-performance team, develop team culture consistent with Canada Gas Operations (CGO) culture and optimize work processes and efficiency
- Ensure compliance with all relevant federal, provincial, and local regulatory requirements and company policies and procedures pertaining to operations and maintenance
- Develop, manage and monitor budgets for the Team

As a leader in Field Operations, you will be expected to:

- Build a strong, competent, proactive, and engaged team
- Develop individual and succession plans for your team
- Work with direct reports and learning and development Support to identify training gaps and opportunities
- Provide on-the-job training opportunities, preferably with a mentor or teacher
- Provide your team with excellent performance feedback, appropriate rewards, recognition, and coaching

- &middledot; Continuously develop your leadership competencies while maintaining a current knowledge of company strategy, goals, and objectives
 - &middledot; Model and hold team members accountable to model TC Energy values
 - &middledot; Ensure that company resources are effectively allocated and utilized to improve reliability and availability of our facilities and to support regional operations
 - &middledot; Manage and coordinate emergency response with a requirement to be on call to respond to emergency situations
- As a member of the Regional Leadership Team, you will be required to:
- &middledot; Work collaboratively to establish the region's strategy, goals, and business plan
 - &middledot; Commit to the execution of the region's business plan
 - &middledot; Collaborate with area managers within and outside region and Supply Chain Management (SCM) to identify contract options
 - &middledot; Represent the company and foster critical partnerships both internally and externally
 - &middledot; Be a champion for continuous improvement and change management
 - &middledot; Contribute to company-wide objectives and initiatives

Minimum Qualifications

- &middledot; Requires a technical trades certificate, technical college diploma, two year associate degree in technical discipline, or equivalent
- &middledot; Minimum 10 or more years of related work experience; prior cathodic protection experience is valued
- &middledot; An equivalent combination of education and experience may be considered

Preferred Qualifications

- &middledot; Demonstrated leadership experience in the area of health, safety and environment, change management, employee development, performance management, and team building skills or exceptional leadership potential
- &middledot; Demonstrated skills and experience in working with strategic vendors and maintain strong relationships
- &middledot; Strong written and verbal communication skills and ability to tailor delivery to suit the audience
- &middledot; Advanced planning and organizational skills with the ability to lead diverse groups
- &middledot; Ability to work independently with minimal direction, comfortable managing multiple priorities and with a strong business acumen
- &middledot; Excellent analytical and problem-solving skills

About our business

Our 93,330 km (57,900-mile) natural gas pipeline network is positioned in two of the most prolific and lowest cost basins in North America - the Western Canadian Sedimentary Basin (WCSB) and the Appalachian Basin. Our systems are well placed to meet the continent's growing demand for clean-burning natural gas by connecting the supply in these basins to important and growing markets across the continent. We supply more than 25 per cent of the clean-burning natural gas consumed daily across North America.
