

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Ministry of Forests

This position may be performed in Chilliwack, Daajing Giids, Powell River, or Squamish.

GIS Analyst

A great opportunity to take the next step in your career

BC Timber Sales (BCTS) is a unique program of the Ministry of Forests (MOF). Working collaboratively with regional and district operations, BCTS plans, develops, and auctions a substantial portion of the province's annual available timber volume. BCTS operations are guided by three overarching principles, forest sector safety, reconciliation with Indigenous Peoples and sustainable forest management.

To find out more about our program check out the BCTS website.

The GIS Analyst conducts advanced spatial data analysis in support of program and management decision making on resource planning, land management and other program issues. This role provides expert advice to clients, business area staff, contractors and business area specialists in the initiation, design, and specifications of projects, types of source data required and available, data base structure, limitations and related specialized applications. The GIS Analyst also develops or contributes to the development and implementation of quality assurance processes, consistent with provincial standards for the business area, including identifying inefficiencies and problems associated with provincial standards, procedures and policies; makes recommendations for improvements to corporate data integrity working groups.

Qualifications for this role include:

Diploma or degree in geographic information systems, or in a related field, such as natural resources, geography or Data Science and three years of related experience.

OR

Equivalent combination of training and five years related experience.

Experience designing and developing customized spatial/database tools.

Experience delivering complex spatial/tabular analysis projects in support of client's business needs.
