

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Ministry of Environment and Climate Change Strategy

One position is available in either Prince George, Williams Lake, or Smithers

Senior Environmental Protection Officer

\$62,983.74 - \$78,666.02 annually plus 5% Recruitment and Retention Allowance

The Senior EP Officer protects the environment by providing authoritative and professional advice to others on the Environmental Management Act and the management of industrial, municipal, agricultural, point and non-point source wastes and hazardous materials. Manages authorizations of high-risk, complex and unique sites/situations in the region, conducting source monitoring to study impacts of toxins and wastes to lead compliance, continuous improvement and effective management of waste discharges into the environment. Leads regional and area-based environmental protection planning, developing systematic approaches, policies and regulations. The position provides authoritative technical and policy advice to ministry staff, elected officials, industry and municipal executives, other agencies and the public on controversial or complex waste management issues.

The BC Public Service offers a healthy work/life balance, excellent benefits, including one of the best pension plans available, and a variety of opportunities for career learning and development. Regular, full time Professional Employee Association members are also entitled to an annual 7% allowance in Lieu of Overtime Shiftwork and Standby (that can be taken as time or money), have a 35-hour work week, and 4 weeksâ€™ annual paid leave. To find out more, explore What the BC Public Service Offers You.

Qualifications for this role include:

â€¢ Masterâ€™s Degree in Environmental Engineering or a related field and three years related experience OR Bachelor of Applied Science or Bachelor of Engineering Degree with at least five years of related experience.

â€¢ Registered in good standing, or eligible for immediate* registration, as a fully licensed professional engineer with the Association of Professional Engineers and Geoscientists of the Province of British Columbia (EGBC).

*Immediately eligible means you are a fully licensed registered professional engineer in good standing in another Canadian jurisdiction and can be immediately transferred to EGBC.

Related Experience must include the following:

• Experience related to environmental protection and Industrial and municipal waste management, such as:

- o Experience with reduction, recycling, treatment and disposal technologies.

- o Experience conducting environmental monitoring, assessments and reporting related to waste discharges.

- o Experience with environmental planning processes such as Liquid or Solid Waste Management Planning.

- o Experience with hazardous material spill response, hazardous waste and contaminated sites.

• Experience using computer software, including word processing (MS Word), spreadsheet (Excel) and database management.

• Experience in working with multiple projects or assignments.

• Experience in negotiation with staff and clients from a diverse background.

How to Apply

For more information and to apply online by February 11, 2019, please go to:
