

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Sr. Full Stack Java Developer

Position Description

We are Canada's largest independent information technology services firm, and after 40 years, we're still growing! We have a challenging career opportunity for a Sr. FullStack Developer to work for one of our clients.

Your future duties and responsibilities

- Lead delivery teams which develop new custom applications, enhance/modernize existing applications, and provides system integration services
- Assist Project Manager in the planning and estimation of project deliverables
- Plan, direct, and daily coordinate activities with the team members
- Contribute to the development of standards and processes
- A technical leader can work in an agile environment that requires adaptation to changing digital transformation needs.
- Supervise the progress of development activities
- Perform code reviews and Support the team in troubleshooting technical issues
- Enforce coding standards and best practices
- Assist project manager with adhering to project deadlines and schedules
- Create High Level and Detailed Design for the projects
- Provide technical leadership to the team.
- Coach, Mentor, and Train team members in Technology and Process.
- Sound knowledge of Agile frameworks like Scrum, Kanban, Lean and xTreme Programming.

Required qualifications to be successful in this role

- 5+ years of full-stack development
- Experience in design, architecture, Proof of Concept, and Proof of Technology
- Excellent understanding of key concepts of architecture in a distributed environment
- Object-oriented programming, design patterns, performance tuning, Web Services, Micro Services, Responsive Web Design
- Solid experience in technology implementation: Java, Spring (Spring Boot, Spring MVC),

Hibernate,

JSP, Servlet, Beans, Angular JS, Angular 6.x, HTML5, CSS3

- Experience with development life cycle including:

- o Source control (Subversion, BitBucket, Git, etc.)

- o Builds and build delivery (Jenkins, Maven, Ant, etc.)

- o Development of unit tests (JUnit, TDD, Mockito, etc.)

- Knowledge of XML , XSLT , XML Schema and JSON

- Experience in developing webpages/websites (Single page application, Progressive Web Applications, Enterprise web applications)

- Experience working with middleware/web server: WebLogic (an asset), Websphere, JBoss, Tomcat

- Programming experience with Oracle PL / SQL or MS SQL or SQL in general

- Experience with JavaScript, Java Swing, JQuery, BootStrap

- Solid experience in debugging and troubleshooting complex distributed systems.

- Proven ability to write high-quality technical documentation

- A hands-on leader (able to code, able to dig deep)

Insights you can act on

While technology is at the heart of our clients' digital transformation, we understand that people are at the heart of business success.

When you join CGI, you become a trusted advisor, collaborating with colleagues and clients to bring forward actionable insights that deliver meaningful and sustainable outcomes. We call our employees "members" because they are CGI shareholders and owners, and, as owners, we enjoy working and growing together to build a company we are proud of. This has been our Dream since 1976, and it has brought us to where we are today-one of the world's largest independent providers of IT and business consulting services.

At CGI, we recognize the richness that diversity brings. We strive to create a work culture where everyone belongs, and we collaborate with clients in building more inclusive communities. As an equal opportunity employer, we empower all our members to succeed and grow. If you require an accommodation at any point during the recruitment process, please let us know. We will be happy to assist.

Ready to become part of our success story Join CGI-where your ideas and actions make a difference.
