

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

About the Opportunity

Our growing Surrey office is looking to add a capable and hardworking Engineer-in-Training (EIT) to our Transportation practice. In this role, you will benefit from the support of industry professionals while working on exciting and challenging projects that make a visible difference in many communities. In addition to the learning and project experience, you can:

- Build your transportation engineering skills and develop an understanding of best practices in a practical, real-world setting
- Apply theory and provide solutions to engineering problems on small and large scale multi-disciplinary transportation projects
- Develop key technical skills related to transportation design, such as geometric and grading design, and civil infrastructure modeling
- Prepare cost estimates and contract documents
- Conduct inspections and act as the client's representative on-site during construction to gather information and ensure that designs are built to specifications
- Contribute to technical reports, plans, studies, proposals, and presentations
- Proactively and professionally communicate with co-workers and clients, gradually building an expansive network of internal and external contacts
- Explore creative and sustainable solutions with our clients to build vibrant communities
- Demonstrate a commitment to learning through the ongoing achievement of personal and professional goals.

Experience

About You

Our preferred candidate will have an interest in transportation and be a recent graduate of a civil engineering degree program with up to 2 years of experience. Existing transportation engineering knowledge is an asset but not required. In addition, the following attributes would be considered of great benefit to this role:

- You have a keen interest in pursuing a career in transportation engineering and working with road

authorities, local municipalities, and Indigenous communities in British Columbia

- You have experience working with industry standard design software such as AutoCAD and Civil3D to carry out design, drafting, and modelling work
- You are able to work on multiple projects concurrently and thrive in a self-directed work environment
- You take initiative, are a problem solver, and continually deliver consistent, high-quality work
- You are suited to consulting, given your instincts for:
 - o Having the ability to listen to others to develop and cultivate positive interpersonal relationships with people from varying backgrounds, including colleagues and clients
 - o Generating practical solutions to problems in a collaborative work environment
 - o Working hard to deliver value to our clients and the communities in which we work
- You hold a valid Class 5 driver's license
