

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Location Calgary, AB

Date Posted From: 2021-10-07 To: 2050-01-01

Job Type: Full-time Category: Resource Sector

Description

Applications Developer Reference Code: 92933 Location: Canada (CA) - Calgary, AB

Job Category: Information Technology/Systems

Employment Type: Employee Full-time

Relocation Eligibility: This position is not eligible for our relocation program

Application Deadline: 10/21/2021 We all need energy. It warms our homes, cooks our food, gives us light, and gets us where we need to go. It also improves our quality of life in countless other ways. TC Energy's job is to deliver that energy to millions of people who depend on it across North America. And we take our job very seriously. Guided by our values of safety, integrity, responsibility and collaboration, we develop and operate our facilities safely, reliably and with care for our impact on the environment. With our presence across the continent, our people play an active role in building strong communities. We're proud of how our hard work and commitment sets us apart and benefits society, every day. We're looking for new team members who share our values and commitment. To remain competitive, support our high-performance culture and allow for more flexibility in the way we work, we offer a hybrid work model and flexible dress code for our eligible office-based workforce in Canada, the U.S. and Mexico. The opportunity The energy industry is primed for digital disruption, and we're excited about the opportunities ahead. We are leading the digital transformation journey by unlocking creativity and innovation in new ways, every day. If you're ready to challenge the status quo to deliver outstanding business results that propel us into the future, we want you to join our team! Our Information Services team is evolving to play a major role in leading innovation in our industry and to meet the needs of our growing business

We are seeking an Applications Developer who has knowledge and experience in BI Tools, mainly Power BI and SAP BW. This individual has the proven skills, competencies and capacity to provide consultation and support on our main BI tools - Power BI and SAP BW. As a member of the Digital Data & Analytics team, this position will also be a key resource to assess new BI tools that will fit our ecosystem. What you'll do

- Power BI Consultation and Support
- Workshop and troubleshoot on Power BI with business team or individual

- data modeling
 - data cleansing, security
 - data automation process design
 - report design
 - Power Query in Excel data modeling
 - Power BI paginated report

 - Power BI Corporate gateway and admin operation
 - Gateway software upgrade
 - Data source driver installation
 - Gateway entry creation and maintenance
 - Admin portal configuration

 - Host Power BI developer Teams Site, SharePoint site
 - Power BI data modeling training sessions
 - SAP Business Warehouse Development:
 - Support the Financial team (specifically Treasury) with BW Data model enhancement and support
 - Work with Business Object reporting tools (Crystal Report, Web Intelligent, Design Studio, Lumira) to build new, enhance existing and support current reports.

 - Works closely with the technical development team to design, develop and implement Business Warehouse development objects through sound BW Modeling on HANA techniques;
 - Executes and integrates system unit testing to validate that the business requirements are met by the SAP system;
 - Aligns architecture and modeling to business processes and requirements;
 - Creates documentation for technical requirements and SAP Business Warehouse solutions as well as knowledge base articles (KBA) for end-user consumption;
 - Analyses causes and provides alternatives and recommended solutions for complex problems;
 - Works collaboratively with the stakeholders on Reporting initiatives to ensure efficient and effective use of the reporting tools;
 - Coordination of the issue resolution and maintenance of reports within SAP and related applications and ensuring this work is performed in accordance with defined Service Level Agreements (SLAs).
 - Address break\\fix tickets submitted through ServiceNow in a timely fashion.
- Minimum Qualifications
- Degree in information technology or computer science or related field
 - Four (4+) years of related work experience
 - Basic understanding of SAP modules, processes and key functionality; basic knowledge of SAP BW Business Content (BW 7.0 and higher)
 - Extraction Transfer Loading (ETL) experience and expert knowledge of ETL objects (info-packages, DTPS, transformations, datasources, process chains)
 - Experience in working collaboratively in an integrated business systems environment
 - Excellent analytical skills demonstrated by the ability to organize thoughts and ideas in a logical

manner to be clearly communicated

- Demonstrated capabilities in judgment, thinking adaptability, systems thinking, customer service orientation, influencing and impact, and self-assertion
- Basic experience handling technical integration between multiple systems for reporting - SAP ECC, SAP BW, BOBJ, BPC
- Experience with standard SAP report tools (BEX Query Designer), the Business Objects (BOBJ) suite of applications (WEBI, Analysis for Excel, Design Studio, Crystal Reports)
- Knowledge of BW reporting structures (composite provider, multi-providers, infocubes and DSOs)

Preferred Qualifications

- Expertise on Power BI and knowledge on other BI Tools
- Knowledge of Business Planning and Consolidation (BPC) and integration with the Business Warehouse is an asset
- SAP Training Certifications in SAP HANA, BW and BOBJ is an asset
- Experience with SAP HANA Data Provisioning and using SAP LT Replication Server (SLT) is an asset

About Information Services

We're driven by the relentless delivery of bottom-line benefits, utilizing talented people, nimble process and the right technology. We're focused on outcome-based innovation and committed to be an idea factory with our business partners. We define success as the delivery of impactful, innovative solutions, not the deployment of technology. Apply now! Apply to this posting by 10/21/2021 using reference code 92933. You must apply through our jobs system at jobs.tcenergy.com. Only applications submitted through our system will be acknowledged.

Applications may be submitted using a mobile device or a desktop / laptop computer. TC Energy is an equal opportunity employer.
