

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Business Analyst - Scheduling Reference Code: 93224 Location: Canada (CA) - Calgary, AB

Job Category: Marketing/Trading

Employment Type: Employee Full-time

Relocation Eligibility: This position is eligible for our domestic relocation program

Application Deadline: 10/20/2021 We all need energy. It warms our homes, cooks our food, gives us light, and gets us where we need to go. It also improves our quality of life in countless other ways. At TC Energy, our job is to deliver that energy to millions of people who depend on it across North America. And we take our job very seriously. Guided by our values of safety, integrity, responsibility, and collaboration, we develop and operate our facilities safely, reliably, and with care for our impact on the environment. With our presence across the continent, our people play an active role in building strong communities. We're proud of how our hard work and commitment sets us apart and benefits society, every day. We're looking for new team members who share our values and are ready to take on exciting challenges. To remain competitive, support our high-performance culture and allow for more flexibility in the way we work, we offer a hybrid work model and flexible dress code for our eligible office-based workforce in Canada, the U.S. and Mexico.

The opportunity

Our hard-working team is evolving to meet the needs of our growing business to support our Liquids Trading and Marketing department.

We are seeking a detailed oriented individual who is responsible for collaborating with working closely with traders, schedulers, business analysts and management and must be competent in performing routine and non-routine activities. The role requires individuals who require minimal supervision with the ability schedule, represent the company well in customer interactions, and provide analytics to support the business unit. The individual will report to the Director of Liquids Marketing and Trading in Houston. What you'll do

- Schedule pipeline and terminal positions, ensuring teams' portfolio needs are met and represent the company well
- Primarily focus on FOB and Market Hub scheduling, as well as providing back up for other existing scheduling roles within the team
- Daily, update and run scheduling work book to upload information into the TCLM system of record, and provide support to Position Reporting analyst
- Collect, consolidate and manage large data sets to be used for market analysis
- Work toward understanding Crude oil markets to provide market views and contribute to trade ideas from a scheduling perspective, including assessments of short- and long-term markets
- Be able to develop views of crude oil infrastructure development and the associated impacts on markets and team's portfolio as well as support business development opportunities
- Must be able to work in a non-regulated environment and meet/respect all compliance and Code of Business ethics requirements
- Position may be adjusted based on the qualifications of the successful candidate
- Other tasks as required

Minimum Qualifications

- University Degree or College Diploma in Business, Commerce or Economics
- Minimum 0 to 15 years of progressive experience

- Advanced computer skills particularly with Excel
- Working knowledge/understanding of the crude oil industry or equivalent
- Excellent interpersonal, organizational, oral and written communication skills
- Strong analytical skills and attention to detail
- Strong data management/database knowledge, ability to efficiently capture data and re-configure into a usable form
- Self-starter who can work with minimal supervision and manage competing priorities under tight deadlines
- Ability to apply skills and knowledge to changing issues and situations
- The drive to learn and succeed
- Proven team player and the ability to develop and maintain collaborative working relationships

Preferred Qualifications

- Experience within the energy industry
- An equivalent combination of education and direct experience may be considered

About our Business

TC Energy is a leading energy infrastructure company in North America. We have three complementary businesses of natural gas pipelines, liquids (oil) pipelines, and power generation. Our operations span three countries, seven Canadian provinces, and 34 U.S. states.

Our 4,900-kilometre (3,000-mile) liquids pipeline system connects growing continental oil supplies to key markets and refineries. The Keystone Pipeline System delivers approximately 20 per cent of western Canadian exports to key refinery markets in the U.S. Midwest and Gulf Coast, where it is converted into fuel and other useful petroleum products
