

# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Link's Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

<b>Company</b>	TC Energy	
<b>Location</b>	Calgary, AB	
<b>Date Posted</b>	From: 2021-12-01	To: 2050-01-01
<b>Job</b>	Type: Full-time	Category: Resource Sector

### Description

ETRM Technical Lead Reference Code: 96642 Location: Canada (CA) - Calgary, AB

Job Category: Information Technology/Systems

Employment Type: Employee Full-time

Relocation Eligibility: This position is not eligible for our relocation program

Application Deadline: 02/28/2022 We all need energy. It warms our homes, cooks our food, gives us light, and gets us where we need to go. It also improves our quality of life in countless other ways. TC Energy's job is to deliver that energy to millions of people who depend on it across North America. And we take our job very seriously. Guided by our values of safety, integrity, responsibility and collaboration, we develop and operate our facilities safely, reliably and with care for our impact on the environment. With our presence across the continent, our people play an active role in building strong communities. We're proud of how our hard work and commitment sets us apart and benefits society, every day. We're looking for new team members who share our values and commitment. To remain competitive, support our high-performance culture and allow for more flexibility in the way we work, we offer a hybrid work model and flexible dress code for our eligible office-based workforce in Canada, the U.S. and Mexico. The opportunity

Our Information Services (IS) department is evolving to meet the needs of our growing business and we are expanding our team to support our Energy Marketing business unit. We are looking for an ETRM Technical Lead responsible for documenting business requirements, application configuration, solution development, documenting technical requirements, testing, implementation and support of the Energy, Trading and Risk Management Business Applications. What you'll do

- You will work with other IS subject matter experts and be responsible for documenting, design, development, configuration, testing and support of the OpenLink Endur and other ETRM business applications as it relates to TC Energy Marketing business unit.
- The ETRM Technical Lead coordinates with vendors, DBAs, IS Infrastructure teams, Technical consultants and other Functional consultants for supporting and implementing solutions.
- Extensive experience working in a commodity trading environment, designing, developing, and implementing technical solutions to meeting complex business requirements. The ideal candidate would have experience in front, middle and back-office functions to include Natural Gas & Financial Deal Capture, Mark to Market and Risk Exposure, Gas Scheduling and/or Settlements and Accounting and Technical delivery leadership.
- Working on multiple projects concurrently and/or multiple high priority user support issues simultaneously.
- Participates in design reviews, advises developers and designers on software design patterns for maintainability, extendibility, and resiliency.
- Coordinates with other application leads for issue resolution and proactively prevents issue occurrence.
- Support interfacing of trades executed on ICE commodities market into Openlink Endur by capturing FIX protocol messages and implementing business logic for trade enrichment.
- Adhere to TC Energy standards on change management, problem management, and incident tracking.
- Use business experience and problem-solving skills to design and develop customization and integration solutions.
- The go-to person for both Business and IT when complex end of day issues occur in Endur.
- Advises management on technical directions, standards, and processes improvements.

- Provides leadership and direction to other team members ensuring processes and procedures including software development lifecycle code management and documentation are followed.
- Manage technical upgrades provided by third-party vendors and facilitate testing and deployment of mandated software updates to production environment without impact to business activities and application usage.
- Designs deployment runbooks and coordinates the efforts with both the technical and business teams.
- Provides production support for all components of a functioning ETRM Application suite.
- Investigates and resolves problems through research and technical analysis.
- Provide off-hours support when needed.

#### Minimum Qualifications

- Bachelor's Degree in Computer Science, Business Administration, or related field.
- Minimum of 10 years of experience leading technical streams of work.
- Minimum 5 years hands-on knowledge around configuration, customization, and integration using Openlink Endur or another ETRM product.
- Detail oriented and effective time management and strong analytical, organization and problem-solving skills.
- Advanced in-depth and broad knowledge of the commodities and power business and ETRM systems.
- Experience in both physical and financial trading of energy commodities.
- Advanced in-depth and broad knowledge of the commodities and power business and ETRM systems.
- High degree of experience configuring and developing customizations using advanced technical expertise in Java Visual Script and Open Components within the Endur application.
- Responsible for actively participating and leading in design, configuration, testing and implementation of technical solutions for the Endur Application.
- Functional and analytical abilities with previous experience supporting full implementations or upgrades.
- Ability to interact with business/user community and/or business analysts to determine functional or technical requirements, to perform custom reporting, or to solve specific application problems or issues.
- Liaise with the different business and technical stakeholders to ensure successful solution configuration.
- Good problem-solving and analytical skills
- Create and execute test plans for the solutions.
- Excellent communication (written and oral) and interpersonal skills.
- Dedicated, motivated, and results oriented and possess an ability to work with minimal supervision.

#### About Information Services

We're driven by the relentless delivery of bottom-line benefits, utilizing talented people, nimble process and the right technology. We're focused on outcome-based innovation and committed to be an idea factory with our business partners. We define success as the delivery of impactful, innovative solutions, not the deployment of technology. Apply now! Apply to this posting by 02/28/2022 using reference code 96642. You must apply through our jobs system at [jobs.tcenergy.com](https://jobs.tcenergy.com). Only applications submitted through our system will be acknowledged. Applications may be submitted using a mobile device or a desktop / laptop computer. TC Energy is an equal opportunity employer.
