

# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

### Description

EIC Measurement Technician (North East BC Area) Reference Code: 97581 Location: Canada (CA) - Fort Saint John, BC

Job Category: Trades/Technical

Employment Type: Employee Full-time

Relocation Eligibility: This position is eligible for our domestic relocation program

Application Deadline: 01/16/2022 We all need energy. It warms our homes, cooks our food, gives us light, and gets us where we need to go. It also improves our quality of life in countless other ways. At TC Energy, our job is to deliver that energy to millions of people who depend on it across North America. And we take our job very seriously. Guided by our values of safety, innovation, responsibility, collaboration and integrity, we develop and operate our facilities safely, reliably and with care for our impact on the environment. With our presence across the continent, our people play an active role in building strong communities. We're proud of how our hard work and commitment sets us apart and benefits society, every day. We're looking for new team members who share our values and are ready to take on exciting challenges. The Opportunity We are seeking a skilled EIC Measurement Technician to join our Canada Gas Operations team in Fort Saint John, BC. Reporting to the North East BC Area Manager, the technician will repair, install, troubleshoot, and perform planned maintenance and corrective tasks on assigned electronic, pneumatic, and/or mechanical control systems, devices, and ancillary equipment.

The successful candidate will also operate and maintain natural gas compression and auxiliary equipment in a manner that meets operational needs, ensuring compliance with company and regulatory requirements. This individual must be a self-starter, capable of working with minimal supervision, who possesses excellent troubleshooting, problem solving, and communication skills. The regular work schedule for this position will be:

Week 1 - Monday to Thursday 9 hours per day

Week 2 - Monday to Thursday 9 hours per day; 8 hours on Friday What you'll do

- Independently inspect, maintain, troubleshoot, configure, and repair:
- Uninterruptable power supplies
- Centrifugal gas compressors and associated systems (surge control system, seals, unit controls, lubrication systems, vibration protection systems)
- Gas turbines and associated systems (surge control system, fuel gas systems, air intake and exhaust, lubrication systems, start systems, power turbine and vibration protection systems)
- Other natural gas facility equipment (control valves, device calibrations, power distribution systems, HVAC systems, relief and over pressure protection devices)
- Natural gas measurement equipment (flow/pressure control systems, RTU's, orifice meters, Coriolis meters, ultrasonic meters, hydrocarbon dewpoint analyzers, H2S analyzers)
- Other systems and equipment relevant to the pipeline system
- Perform valve maintenance
- Perform emergency repairs to meet customer and client needs
- Interpret technical reference documents, drawings, and vendor manuals
- Lead/manage the safe and efficient completion of low/medium complexity projects including the coordination and

monitoring of contractor work activities or third-party active control

- Ensure facilities, personnel, and contractors comply with TC Energy's safety, health, environment, and risk standards
- Provide coaching, mentoring, and training to other personnel
- Complete work orders, enter data into job plans, create new work orders, etc. in SAP

#### Minimum Qualifications

- Minimum completion of third year of trades program or 2 years of technical training from a recognized institution
- 2 years of relevant industrial work experience
- Experience maintaining control systems to include a thorough understanding of the test equipment used to maintain the system

#### Preferred Qualifications

- Fully certified Journeyman Instrument or Controls Technician or Instrument Mechanic
- Instrumentation and/or Valve maintenance experience
- Experience working with high pressure natural gas
- Industry related certifications and/or experience
- Mechanical aptitude
- Familiarity with SAP and the Microsoft Office suite (Excel, Word, Outlook, etc.)

This position requires candidates to:

- Have and maintain a valid class 5 driver's license and provide a driver's abstract for review
- Successfully complete a pre-employment medical screening, to include drug and alcohol testing
- Carry a Company provided cell phone and work a rotating on-call schedule
- Be subject to call out 24 hours a day, 7 days a week and work extended days and/or weeks for emergency response purposes
- Travel to other company locations for temporary assignments, meetings, or training which would involve some overnight stays away from home
- Be subject to working conditions which include adverse weather and temperatures and cramped conditions

About our business TC Energy is a leading energy infrastructure company in North America.
