

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Come join our growing Saskatoon practice as an enthusiastic and motivated Climate Change Consultant. Do you want to play a role in integrating climate change components on a wide range of projects and finding balanced solutions to further the importance of proactive resilience, sustainability, conservation, biodiversity, and natural processes in our work Come talk to us!

Our Saskatoon team is comprised of a collective of professionals who serve Indigenous communities, local government, and private sector clients in a variety of projects throughout the province. Our local efforts here are supported by colleagues, resources, and expertise available across the entire company. Our team of strategic climate change professionals provides advice and works alongside clients to develop climate change adaptation plans and incorporate climate resilience principles into community initiatives.

- Learn about funding programs that support communities with strategic climate services and prepare applications and work programs
- Demonstrate an aptitude for consulting and entrepreneurship
- Facilitate engagement and workshops with community members and leadership teams
- Provide technical support for vulnerability and risk assessments and the development of resilience plans
- Communicate effectively with clients, community members and internal project teams
- Keep up to date on emerging climate change assessment frameworks, tools and data sources
- Demonstrate a commitment to learning through the ongoing achievement of personal and professional goals
- Be a champion for the environment and our team, within and outside of Urban Systems

Experience

Our preferred candidate will be a graduate with a B.Sc. degree focusing on Environmental Engineering, Natural Resource Science, or Environmental Science with 2-5 years of experience. We will also consider a graduate from other degree programs with equivalent experience. Experience working in a similar role with Indigenous communities will be viewed as an asset. Candidates with all ranges of experience will be considered. The following skills and abilities will also be a benefit:

- An appreciation for consulting and a drive to establish a self-directed and collaborative practice
- Strong technical skills which continually demonstrate capabilities as a consultant
- Desire to grow knowledge in approaches to climate change resilience
- Capable and enthusiastic about playing an integral role in vulnerability and risk assessments and community engagement
- Ability to develop and nurture positive interpersonal relationships with people from varying backgrounds including team members, clients, and partners
- Willing to travel to various communities in the prairies and other geographies of the company both to meet with clients as well as internal project teams
