

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

About the Opportunity

Our Abbotsford office is looking to add a capable and hardworking Engineer-in-Training (EIT) to our team. Are you keen to benefit from the support of industry professionals while working on exciting and inspiring projects that make a visible difference in many communities? If you like solving problems, enjoy working with diverse teams and are driven by our purpose to serve vibrant communities, let's connect! In addition to the learning and project experience, you can:

- Hone your civil engineering skills, apply theory, and provide workable solutions for infrastructure design and planning, including roadways, water, sanitary, and drainage
- Build and grow relationships with existing project leaders and clients; proactively and professionally communicate with contractors, co-workers, and clients
- Explore creative and sustainable solutions together with project leaders and our clients to build vibrant communities
- Prepare and work collaboratively with our design teams to develop design drawings, construction details, specifications, cost estimates and contract documents.
- Conduct construction inspections and support in contract administration
- Establish relationships with communities and act as the clients' representative on-site during construction to gather information, conduct inspections, and ensure that designs are built to specifications
- Provide accurate and timely input on technical reports, plans, studies, proposals, and presentations

Experience

About You

This opportunity is well suited to graduates from a Civil or Environmental Engineering degree program who will be eligible to obtain professional designation with EGBC as an EIT. Recent graduates or those with related experience will be considered. Candidates who are in the process of applying for their professional designation (P.Eng.) or have recently obtained it are also encouraged to apply.

In addition, the following attributes would be considered a benefit to this role: •

- You take the initiative, are a problem solver and continually deliver consistent, high-quality work
- You are passionate about understanding key community dynamics and working closely with clients and partners to provide innovative and "out of the box" solutions
- You practice proactive communication, listen to others and enjoy collaborating with people of varying backgrounds and perspectives
- You are available to travel throughout Lower Mainland and British Columbia for project work, including visiting communities
- You are committed to ongoing personal and professional development
- Experience using AutoCAD or Civil 3D for design drafting of linear infrastructure
- Experience and understanding of GIS and asset management
- A valid class 5 drivers' license
