

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

## Description

Ministry of Forests, Lands, Natural Resource Operations and Rural Development Smithers

Ecosystem Biologist

\$66,557.72 - \$75,884.38 annually, plus \$32.89 bi-weekly isolation allowance

Make a difference in this rewarding career opportunity

The Resource Management Division of the Ministry of Forests, Lands, Natural Resource Operations and Rural Development works to maintain and restore the natural diversity of ecosystems, fish and wildlife species and their habitats. Through the development and implementation of clear strategies, legislation, partnerships, innovative projects, science-based standards and effective monitoring and reporting, the Division aims to reduce the number of ecosystems and species at risk while balancing conservation of Crown land with resource access and development.

As the Ecosystem Biologist, you will be working within the Skeena Ecosystem Section to help meet these objectives by developing and implementing ecosystem conservation, restoration, and enhancement projects, providing expert advice to decision makers, developing objectives, and mitigation and management strategies. You will also be developing and implementing ecosystem conservation, restoration, and enhancement projects in urban, agricultural and/or forest settings.
