Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

DataStage Engineer
Position Description
CGI has an opportunity for an ETL DataStage Engineer to join this multifaceted organization! With your expertise, you will work with a hard-working team to advise and develop solutions for a major client. You will support and interact with the client daily with a focus across the organization.
You will have the opportunity to show/grow with technology in a customer-facing role. Work independently under limited supervision and apply your knowledge to efficiently address technical issues and help support the team. Your success will be directly related to CGI's and our client's success.
Your future duties and responsibilities
- Translate requirements and data mapping documents to technical design.
- Develop, improve, and maintain code following practices and standards.
- Create and implement unit test plans. Support regression, system testing.
- Debug and resolve problem issues found during testing and/or production.
- Communicate status, issues, and blockers with the project team.
- Support continuous improvement by identifying and solving opportunities.
Required qualifications to be successful in this role
- Minimum 6 years of validated experience in Designing and Developing IBM DataStage (11.x)
- Expertise with Data Warehousing ETL Tool DataStage using Components like DataStage Designer, DataStage Director and DataStage Operations Console.
- Experienced in Data warehousing concepts, dimensional Star Schema and Snowflakes Schema methodology.
- Expertise in crafting DataStage Server jobs, Parallel Jobs, Job Sequencing, Crafting Parameter Sets, Container, Environment Variables and Crafting Parallel Routines, Data Cleansing and Writing Transformation expressions to derive values and remove unwanted data.
- Possess experience in different stages like Transformer, look up, merge stage, ODBC connector, Oracle connector etc.
- In depth experience in solving DataStage jobs and addressing issues like performance tuning.

- Efficient in all phases of the development lifecycle, coherent with Data Cleansing, Data Conversions, Performance Tuning and System Testing.
- Analytic and problem-solving skills.
- Unix shell script skills
- SQL skills with experience of working on Oracle and/or Teradata DB
- Good standout colleague and co-ordinate with multiple teams
- Experience working in Agile teams in onshore- offshore model

Desired qualifications/non-essential skills:
- Knowledge of AWS (especially Glue)
- Solid grasp of Python scripting
- Familiarity with Agile development methodology and concepts
- Knowledge of Testing methodologies
- Ability and curiosity about learning new technologies
- Self-starters and be able to work in a fast paced, demanding, and constantly evolving environment
- Ability to perform detailed analysis of business problems and technical environments.
- Strong oral and written communication skills.
- Positive relationship and partnership skills.
- Health Care / Health Services business area domain expertise preferred
- Bachelor's degree in computer science or related field

Insights you can act on

While technology is at the heart of our clients' digital transformation, we understand that people are at the heart of business success.

When you join CGI, you become a trusted advisor, collaborating with colleagues and clients to bring forward actionable insights that deliver meaningful and sustainable outcomes. We call our employees "members" because they are CGI shareholders and owners and owners who enjoy working and growing together to build a company we are proud of. This has been our Dream since 1976, and it has brought us to where we are today - one of the world's largest independent providers of IT and business consulting services.

At CGI, we recognize the richness that diversity brings. We strive to create a work culture where all belong and collaborate with clients in building more inclusive communities. As an equal-opportunity employer, we want to empower all our members to succeed and grow. If you require an accommodation at any point during the recruitment process, please let us know. We will be happy to assist.

Ready to become part of our success story Join CGI - where your ideas and actions make a difference.
