

# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Link's Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Closing Date (MM/DD/YYYY): 02/28/2021

Worker Type: Permanent

Language(s) Required: English

Expertise in cyber security needed

Based on your extensive experience in cyber security, infrastructure, networks, and cloud architecture, youâ€™ll lead the development of strategies to secure our applications, network and infrastructure.

What youâ€™ll do:

- Drive strategic technology decisions and direction
- Understand how products integrate across the FCC technology landscape
- Develop, implement and oversee complex and critical technologies
- Ensure effective use of and compliance with information governance
- Define metadata management architecture and metadata model
- Develop a domain-based taxonomy
- Make recommendations regarding regulatory guidelines

What weâ€™re looking for:

- Relationship-builder with proven history of motivating others
- Ability to correlate technical work to business outcomes
- Critical thinker with natural intellectual curiosity and strong analytical skills
- Problem-solver able to manage multiple priorities and requests
- Confident communicator who can coach and mentor others

What youâ€™ll need:

- A bachelorâ€™s degree in computer science, mathematics or engineering and at least 10 years of experience (or equivalent combination of education and experience)
- In-depth understanding of FCC business practices and technologies
- Expert-level knowledge of information technology practices and processes
