Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Closing Date (MM/DD/YYYY): 08/14/2020
Worker Type: Permanent
Language(s) Required: English
Advanced statistical, risk management and modelling expertise required
Manage a team to support organizational strategy and financial and risk management through development and management of credit risk, adjudication, financial and regulatory models.
What youâ€™ll do:
- Lead a team of specialists as they develop, monitor and maintain the organizationâ€™s credit risk, adjudication, financial and regulatory models.
- Determine approaches used to develop models, including variable selection, and methodologies
- Leads and oversee the implementation of new or updated models, including engagement with internal partners
- Liaises with industry experts and external consultants to understand industry best practices
What weâ€™re looking for:
- Experienced leader who brings out the best in team members and provides a clear line of sight to business goals
- Strong communicator who can build relationships across the corporation
- Multi-tasker who can ensure projects move forward under predetermined timelines
What youâ€™ll need:
- In-depth understanding of credit risk, adjudication, financial and regulatory risk modelling techniques and standards and general knowledge of model management practices in financial organizations
- Professional designation (CFA, ASA, FSA) and/or completed an undergraduate degree in business administration, computer science or mathematics/statistics
- 7 to 10 years experience or an equivalent combination of education and experience
