

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Link's Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

We are currently looking for a Sr. ServiceNow Application Developer to join our Global IT Division in our Toronto office.

As a Sr. Application Developer this role will focus on the technical responsibility for design, implementation and continuous improvements for the respective domain and facilitates. Additionally providing advice, assistance and leadership in enhancing the quality of software design, development, configuration and integration.

Your job

THE ROLE:

- Specifies, designs, codes and takes responsibility for large or complex systems. Selects appropriate design standards, methods and tools, consistent with agreed enterprise and solution architectures and ensures they are applied effectively and along standard.
- Reviews systems designs to ensure selection of appropriate technology, efficient use of resources, and integration of multiple systems and technology
- Sets policy and standards for solution development projects. Promotes benefits of addressing security issues .
- Supports the design of system architecture and related interfaces. Coaches Application Developers in software development capabilities
- Steers and controls the integration build, accepts software modules from Application Developers, and produces software builds for loading into the target environment
- Steers and control coding quality.

Your profile

QUALIFICATIONS:

- Bachelor's degree in business administration, information technology, computer science, engineering, or related field of study (or equivalent work experience).
- Master's degree, continuing coursework and Certifications in ITIL, COBIT and/or project management are desirable
- 5-7 years of professional background as an application developer. Experience in developing in a DevOps and/or cloud environment would be considered an asset
- Advanced knowledge and experience in ServiceNow, PowerShell, Java, Microsoft family of development technologies, DB programming in MS SQL and/or Oracle platforms.
- Strong understanding of infrastructure automation using Ansible or Chef, familiarity with Dynatrace and/or other similar availability and telemetry capabilities, or hands on experience with master data management using tools such as MS SQL MDS or Informatica are all pluses. Strong knowledge of DevOps & AI Ops. is highly desirable
- Ability to function as a member of a team, willing to contribute in any capacity required to achieve success.
- Strong communication and presentation skills. Ability to coordinate, multiple task and deliver under tight deadlines. Highly adaptive interpersonal skills to function across all levels, communicating with C-office and hands-on technicians alike.
- Constantly innovates and identifies creative solutions to complex challenges. Proven track record of working globally across cultures and time zones.

About us
