Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Analysis, response and negotiation expertise required
Join an Agile development team accountable for delivering solutions that enable organizational change. You'll provide informal leadership for the team, interacting with a variety of business partners to enhance and simplify business process, facilitate decision-making and implement solutions for more complex business and technical domains.
What you'll do:
- Provide informal leadership to the team providing data solutions for the FCC analytics community
- Collaborate to provide solutions to data requirements that support immediate and long-term business needs
- Work with colleagues to prioritize and remediate issues and fill information needs
- Facilitate problem and solution negotiations with business stakeholders and IT teams
What we're looking for:
- Problem-solver with strong facilitation and analytical skills who can manage multiple priorities
Self-starter with intellectual curiosity and perseverance
- Strong communicator comfortable building partnerships with key stakeholders
- Team player who embraces change and strives to improve and innovate processes
What you'll need:
- An undergraduate degree in business, computer science, or engineering and at least four years of related experience (or equivalent combination of education and experience)
