

# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

### Description

Closing Date (MM/DD/YYYY): 08/06/2021

Worker Type: Permanent

Language(s) Required: English

Financial analysis expertise required and pricing experience rewarded.

Lead the development and continual improvement of key customer and market analytics as well as critical pricing reports and measures. Youâ€™ll develop a deep understanding of markets and customers and create easy ways to showcase discoveries.

What youâ€™ll do:

- Understand specific business domain(s) and drive insights from data, ensuring needs are met
- Create analytics solutions from a large variety of structures and sources
- Work with stakeholders and teams to ensure analysis is understandable and actionable across subject areas
- Analyze and reveal insights to decision makers, and help with sense-making and recommendations

What weâ€™re looking for:

- An analytical thinker who can design and develop strategies to assist business users in quickly finding the information they need to make better business decisions
- Creative problem-solver with strong research and analytical skills
- Relationship-builder comfortable making recommendations for improvements in data process and quality

What youâ€™ll need:

- A bachelorâ€™s degree in agriculture, finance, business, economics, mathematics, statistics, or computer science and at least four years of experience (or an equivalent combination of education and experience)
- An understanding of statistics and mathematics or data configuration combined with strong business domain knowledge
- Advanced working knowledge of data manipulation and management tools, as well as mastery of one or more visualization tools
