

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Link's Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Do you want to help shape Canada's financial services industry

|Who We Are

The Canadian economy depends on the exchange of billions of dollars each day. Payments Canada is responsible for the clearing and settlement infrastructure, processes and rules essential to those transactions.

Like a complex network of bridges and roads, Payments Canada connects. We connect with our system participants and stakeholders to promote value flow in the economy. And we connect payers and payees to meet the needs of Canadian businesses and consumers.

In accordance with our mandate, Payments Canada also facilitates the interaction of our systems with other payment systems, both within Canada and internationally, and facilitates the development of new payment methods and technologies.

|Who You Are

There are huge transformations taking place in global payments you may already be aware of some of these advancements because you have an active interest in learning more about our industry.

You get energized at the thought of working in a fast-paced environment and are able to work as a team player in a multi-project environment. You are someone who is detail-oriented and conscientious, and are curious about learning new technologies, processes, and business strategies. You are comfortable sharing ideas when your input is requested and are able to communicate clearly both orally and in your written work.

|The Position

Reporting to the Manager of API, Network and Directory Services (ANDS), the Student, Application Development will be given the opportunity to get hands on experience developing and contributing to current Payments Canada technology projects. Payments Canada will provide the Student, Application Development with the tools and technologies in order to make meaningful contributions towards these efforts.

Some of the key activities for this role will include:

- Assisting in writing automation tests and other Quality Assurance (QA) practices.
- Assisting the development team with bug fixes and writing software features as required
- Participating in QA activities and develop detailed test cases and scenarios for multiple use cases.
- Use of Agile practices
- Contributing in developing test automation utility libraries and enhance in-house automation framework.
- Participating in other tasks related to Application Development

You'll also gain hands-on experience working with some or all of the following technologies and tools:

Tools:

Confluence, JIRA, GitHub, IntelliJ

Technology:

Angular 5+, JavaScript/Typescript, Java/Spring Boot, PostgreSQL, Automation Frameworks (TestNG, Mocha), Jmeter, Google Cloud Platform, Docker

Education Requirements

Currently a post-secondary student with a focus in Computer Science/programming or related field.

Essential Skills

- Outstanding work ethic, ability to work in a dynamic team environment, and excellent problem-solving skills
- Intellectual curiosity, ability to learn quickly, and strong attention to detail

Additional Skills

Experience working with any of the above listed tools and technologies is a bonus.

Other

|Payments Canada as an Employer

Talent development is a priority at Payments Canada. Advancement of your skills and competencies is of mutual benefit to you as an individual and to us as an organization. Payments Canada will provide you with a team environment and organizational culture that will support continued growth and individual

learning opportunities that progress you along a rewarding career path.

We are committed to developing inclusive, barrier-free recruitment and selection processes, and a work environment that supports our diverse workforce. Please let us know if you require accommodations at any stage of the recruitment process. We can be reached at hr@payments.ca.

How to Apply

If this role excites you, we want to hear from you at hr@payments.ca!

We look forward to learning more about your past accomplishments and educational and career journey to date in your accompanying cover letter and resume.

Closing Date: October 2nd, 2020
