

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Ministry of Environment and Climate Change Strategy: Victoria

There is currently 1 temporary opportunity available until October 31, 2022. This temporary opportunity may become permanent.

Senior Product Manager

Bring your Product Manager skills, knowledge and experience to this rewarding position

British Columbia's Natural Resource Ministries (NRM) are the stewards of the Province's Crown land and natural resources which reflect the diverse values and interests of all British Columbians. In order to support the growth of the economy while providing effective environmental stewardship, the province's NRM must transform in order to advance the shared management of British Columbia's natural resources.

The Information, Innovation and Technology (IIT) Division is leading the modernization and transformation of business practices for the NRM through continuous improvement projects, new technology options and operational information management/information technology (IM/IT). The IIT Division is providing leadership for IM/IT planning, policy and business process solutions and is also the single authority for all information and technology across the NRM.

As the Senior Product Manager, you will be responsible for guiding the contribution of one or more product lines to the business unit. You will be leading one or more multi-disciplinary agile delivery teams to help deliver new products and programs to meet user needs, expectations, and enhance projects across government.

The BC Public Service is committed to creating a diverse workplace represent the population we serve and to better meet the needs of our citizens. Consider joining our team and being part of an innovative, inclusive, and rewarding workplace.

Qualifications for this role include:

- Degree or diploma in a technology discipline or project management, or an equivalent combination of education and related experience.

- Experience leading a multi-disciplinary agile delivery team to deliver new products and/or iterations to existing products to meet user needs and experience expectations.

- Experience delivering digital products or service; design, and ongoing management of high-quality services which maximize opportunities offered by digital technology.

- Experience in analyzing and using customer insight, user and performance data to design and continually improve digital services to fully meet user needs in a convenient and straightforward way.

- Experience with current agile practices, open source, cloud platforms and digital services.

- Experience prioritizing product development and delivery plans to meet user and stakeholder needs in a cost-effective way.

- Experience prioritizing work and reporting based on value delivered and return on investment.
